RAIFFEISEN BANK SA Statement regarding the responsibility for preparing the financial statements 31 December 2020

In accordance with article 10, paragraph 1 from republished accounting Law No. 82/1991, the responsibility for the accounting organization and management belongs to the administrator, to the person authorized for credit release or to other person in charge with administration of the entity.

Officially in charge as vice-president and chief financial officer of Raiffeisen Bank S.A. - parent company, in accordance with article 31 from republished accounting Law No. 82/1991, I assume the responsibility for preparing the consolidated and separate financial statements as of 31 December 2020 and I confirm that:

- a) accounting policies used for preparing the consolidated and separate financial statements as of 31 December 2020 are in accordance with Order of the National Bank of Romania No. 27/2010 and related amendments, which require that these consolidated and separate financial statements to be prepared in accordance with International Financial Reporting Standards as endorsed by the European Union;
- b) consolidated and separate financial statements prepared as of 31 December 2020 fairly reflect the financial position, statement of comprehensive income, statement of changes in equity, statement of cash flow and the related notes for the activity developed in accordance with Order of the National Bank of Romania No. 27/2010 and related amendments, which require that these consolidated and separate financial statements to be prepared in accordance with International Financial Reporting Standards as endorsed by the European Union.

Mihail Ion

INDEPENDENT AUDITOR'S REPORT

To the Shareholders of Raiffeisen Bank S.A.

Report on the Audit of the Consolidated and Separate Financial Statements

Opinion

We have audited the consolidated and separate financial statements of Raiffeisen Bank S.A. (the Bank) with official head office in 246C Calea Floreasca Bd, Bucharest, Romania, identified by sole fiscal registration number RO 361820, which comprise the consolidated and separate statement of financial position as at December 31, 2020, the consolidated and separate income statement, the consolidated and separate statement of comprehensive income, the consolidated and separate statement of changes in equity and the consolidated and separate statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

In our opinion, the accompanying consolidated and separate financial statements give a true and fair view of the consolidated and separate financial position of the Bank as at December 31, 2020, and of its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with the National Bank of Romania Order no 27/2010, approving the accounting regulations compliant with the International Financial Reporting Standards for credit institutions, with subsequent modifications and clarifications.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs), Regulation (EU) No. 537/2014 of the European Parliament and of the Council of 16 April 2014 ("Regulation (EU) No. 537/2014") and Law 162/2017 ("Law 162/2017"). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Bank in accordance with the International Code of Ethics for Professional Accountants (including International Independence Standards) as issued by the International Ethics Standards Board for Accountants (IESBA Code) together with the ethical requirements that are relevant to the audit of the financial statements in Romania, including Regulation (EU) No. 537/2014 and Law 162/2017 and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated and separate financial statements of the current period. These matters were addressed in the context of our audit of the consolidated and separate financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the "Auditor's responsibilities for the audit of the financial statements" section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated and separate financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated and separate financial statements.

Key audit matter

Impairment of loans and advances to customers

The net carrying values of loans and advances to customers of 28,220,851 thousand RON at the level of the bank and of 28,773,060 thousands RON at the level of the Group represents a significant part (55.03%) of the total assets of the bank as at 31 December 2020, and (55.28%) respectively, of the total assets of the Group as at 31 December 2020.

Management's assessment of impairment indications and determination of Expected Credit Loss (ECL) for loans and advances to customers is a complex process and involves significant judgement. Such an assessment is inherently uncertain, involving forecasting of future macroeconomic conditions in a number of scenarios, assessing the likelihood of such scenarios, their impact on ECL as well as an assessment of Risk of Default, Loss Given Default and Exposure at Default by employing models based on a series of historical data and quantitative techniques.

The uncertainties in the environment in the context of COVID-19 crisis, including moratoria and governmental support measures, led to an increased complexity of the expected loss estimation in the form of post model adjustment/ overlays and judgment regarding staging criteria.

The potential effect of the above items is that it has a high degree of estimation uncertainty, with a potential range of reasonable outcomes, significantly different than estimated impairment allowance.

Notes 3j, 5, 6 and 21 to the consolidated and separate financial statements present more information on the estimation of impairment allowance for loans and advances to customers.

Due to the significance of loans and advances to customers, the uncertainties involved and related complexity of estimation techniques we consider the Impairment of loans and advances to customers a key audit matter.

How our audit addressed the key audit matter

Our audit procedures included, among others, the assessment of the Bank's methodology regarding the identification of impairment and determination of expected credit losses, including the determination of macroeconomic scenarios and their weight, staging criteria and the credit risk parameters models like Probability of Default, Loss Given Default and Exposure at Default.

We assessed the design and evaluated the operating effectiveness of internal controls over the monitoring of the quality of loans and advances to customers, parameters' models, , macroeconomic scenarios and related weights, post model adjustments/ overlays, loss allowance calculations as well as controls over quality of underlying data and relevant systems.

We also assessed the macroeconomic scenarios and related weights and examined the approach used in determination of the Covid 19 post-model adjustments/ overlay .

For the loss allowance of impaired loans assessed on an individual basis (stage 3), our evaluation was focused on the loans with the most significant potential impact on the consolidated and separate financial statements and considered the key assumptions underlying the impairment identification and quantification such as estimated future cash flows, including the realizable value of collaterals and estimates of recovery on default. We compared with the available market information based on our own experience on the matter.

For expected credit losses for loans assessed collectively either in stage 1, 2 or stage 3 we tested the key risk parameters' models by involving our credit risk specialists to reperform the modeling for a sample of models, re-performed staging and re-calculated expected credit losses.

We further assessed the adequacy of the Bank's disclosures in the consolidated and separate financial statements regarding exposure to credit risk.

Key audit matter

Provisions for litigations and potential risks

The carrying amount of provisions for litigations and potential risks is in amounts of 201,711 thousand RON at Group level and 144,703 thousand RON at Bank level.

The process for determining the provisions is an estimation process involving a high level of judgement, therefore there is an inherent risk that the existing provisions at year-end may significantly differ from the actual outflow of economic resources in subsequent years. The main aspects for which the management exercised judgment are the disputes and litigations related to consumer protection, other disagreements with clients, Court of Accounts control in Bank's subsidiary and tax authorities audit; Notes 36, 41 (ii) and 28 (i) to the consolidated and separate financial statements present more information on their estimations. Given the inherent uncertainties with respect to the final outcome of pending and potential disputes and litigations the management applies judgement in predicting the final outcome and uses estimates in relation to determination of the provisions.

Provisions for litigation and other risks are significant to our audit because the assessment process is complex and judgmental, and the amounts involved are significant.

How our audit addressed the key audit matter

Our audit procedures were focused on the judgments and estimates which could give rise to material misstatement or are potentially subject to management bias:

- We performed a detailed understanding of the Bank's process of identifying and determining the litigation and other risks provisions and the related documentation flow and assessed the design of the related controls;
- We examined Board of Directors and Supervisory Board meetings minutes to obtain an understanding of all significant legal and other risks matters;
- We conducted discussions with management and Bank's legal department to understand the status of each significant litigation and dispute and Bank's assessment regarding the potential loss;
- We assessed the principles and assumptions used by the Bank to estimate the amount of provisions;
- We examined the fact pattern for the current disputes and litigations have assessed the adequacy of the provisions based on the Bank's assumptions;
- Our tax and legal experts were involved, where applicable, in the analysis and corroboration the assumptions used in determining the provisions and contingent liabilities by considering the relevant legal requirements;
- We obtained written confirmations from the external legal counsels and compared their opinions with management's assumptions and assessment regarding the impact in the financial statements.
- We also evaluated the adequacy of the Bank's disclosures in the consolidated and separate financial statements regarding provisions for risks and litigations.

Key audit matter

Information Technology (IT) systems relevant for financial reporting

A significant part of the Bank's operations and financial reporting process is reliant on IT systems involving automated processes and controls over the capture, storage and processing of information. An important component of this internal control system involves the existence of and adherence to appropriate user access and change management processes and controls. These controls are particularly important because they ensure that the access and changes to IT systems and data are made by authorized persons in an appropriate manner.

The IT environment of the Bank is complex with a significant number of interconnected systems and databases. Besides, the new way of working adopted in all areas of the Bank brings changes and further complexity.

Given the level of automation of the processes relevant for financial reporting and given the complexity of the IT environment of the Bank, a high proportion of the overall audit procedures was concentrated in this area. We therefore consider that this area represents a key audit matter.

How our audit addressed the key audit matter

We focused our audit procedures on those IT systems and controls that are significant for the financial reporting process. As the audit procedures over the IT systems require specific expertise, we involved our IT specialists to assist us in performing the audit procedures.

Our audit included, among others, the following procedures:

- Understanding and assessing the overall IT control environment and the controls in place, including the ones over access to systems and data, and considering the context of work from home, as well as IT system changes. We tailored our audit approach based on the importance of the system for the financial reporting;
- We tested the operating effectiveness of controls over granting access rights to
 determine if only appropriate users had the ability to create, modify or delete user
 accounts for the relevant applications;
- We tested the operating effectiveness of controls around the development and changes of applications to determine whether these are appropriately authorized, tested and implemented;
- We assessed and tested the design and operating effectiveness of the application and IT-dependent controls in the processes relevant to our audit.

Other information

The other information comprises the Directors' Report (which includes the Non Financial declaration) and the Annual Report, but does not include the consolidated and separate financial statements and our auditors' report thereon. We obtained the Directors' Report prior to the date of our auditor's report, and we expect to obtain the Annual Report after the date of our auditor's report. Management is responsible for the other information.

Our audit opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated and separate financial statements in accordance with the National Bank of Romania Order no 27/2010, approving the accounting regulations compliant with the International Financial Reporting Standards for credit institutions, with all subsequent modifications and clarifications, and for such internal control as management determines is necessary to enable the preparation of the consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Bank's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists.

Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters.

Report on Other Legal and Regulatory Requirements

Reporting on Information Other than the Financial Statements and Our Auditors' Report Thereon

In addition to our reporting responsibilities according to ISAs described in section "Other information", with respect to the Directors' Report, we have read the Directors' Report and report that:

- a) in the Directors' Report we have not identified information which is not consistent, in all material respects, with the information presented in the accompanying consolidated and separate financial statements as at December 31, 2020;
- b) the Directors' Report identified above includes, in all material respects, the required information according to the provisions of the National Bank of Romania Order no 27/2010, approving the accounting regulations compliant with the International Financial Reporting Standards for credit institutions, with all subsequent modifications and clarifications, Annex 1 points 11-14 and 37-38 respectively;
- c) based on our knowledge and understanding concerning the entity and its environment gained during our audit of the consolidated and separate financial statements as at December 31, 2020, we have not identified information included in the Directors' Report that contains a material misstatement of fact.

Other requirements on content of auditor's report in compliance with Regulation (EU) No. 537/2014 of the European Parliament and of the Council

Appointment and Approval of Auditor

We were appointed as auditors of the Bank by the General Meeting of Shareholders on May 2nd 2018 to audit the consolidated and separate financial statements for 3 years covering the financial periods end December 31st, 2018 till December 31st 2020. Total uninterrupted engagement period, including previous renewals (extension of the period for which we were originally appointed) and reappointments for the statutory auditor, has lasted for 9 years, covering the financial periods end December 31st, 2012 till December 31st, 2020.

Consistency with Additional Report to the Audit Committee

Our audit opinion on the consolidated and separate financial statements expressed herein is consistent with the additional report to the Audit Committee of the Bank, which we issued on the same date.

Provision of Non-audit Services

No prohibited non-audit services referred to in Article 5(1) of Regulation (EU) No. 537/2014 of the European Parliament and of the Council were provided by us to the Bank and we remain independent from the Bank in conducting the audit.

In addition to statutory audit services and services disclosed in the consolidated and separate financial statements, no other services were provided by us to the Bank, and its controlled undertakings.

1. REPORTING ENTITY

Raiffeisen Bank SA (the "Bank") started its operations on 1 July 2002 upon the merger by acquisition of Raiffeisen Bank Romania SA by Banca Agricola Raiffeisen SA through issue of shares. The merger between the two banks was finalized on 30 June 2002 with the purpose of streamlining the operations of the Raiffeisen Group in Romania.

The Bank is licensed by the National Bank of Romania to conduct banking activities. The current registered office is located at Sky Tower Building, Calea Floreasca, no 246 C, district 1, Bucharest, Romania.

The consolidated and separate financial statements of the Bank for the year ended 31 December 2020 comprise the Bank and its subsidiaries (together referred to as the "Group").

The Group is primarily involved in corporate and retail banking, investment and activities services, leasing and asset management services.

The main activity of the Bank is to provide day-to-day banking services to corporate and individual clients. These include: accounts opening, domestic and international payments, foreign exchange transactions, working capital finance, medium term facilities, bank guarantees and letters of credit. The Group also provides financial leasing services, loan services in locative system and asset management services. The Group operates through the Head Office located in Bucharest and through its network of 333 branches as at 31.12.2020 (2019: 351 branches).

The Bank is managed in accordance with the dual management system by a Supervisory Board made up of 9 members and a Management Board made up of 7 members.

The members of the Supervisory Board as of December 31, 2020 are as follows:

- Johann Strobl Chairman
- Hannes Mösenbacher Deputy Chairman
- Andreas Gschwenter Member
- Peter Lennkh Member
- Anca Ileana Ioan Independent Member
- Ana Maria Mihaescu Independent Member
- Lukasz Janusz Januszewski Member
- Andrii Stepanenko Member
- Pedro Miguel Weiss Independent Member

The structure of the Management Board as of December 31, 2020 is as follows:

- Steven van Groningen President;
- Cristian Sporis Vice-president, coordinating the Corporate Division;
- James D. Stewart. Jr. Vice-president, coordinating the Treasury and Capital Markets Division;
- Bogdan Popa Vice-president, coordinating the Operations and IT Division;
- Vladimir Kalinov Vice-president, coordinating the Retail Division;
- Mircea Busuioceanu Vice-president, coordinating the Risk Division;
- Mihail Ion Vice-president, coordinating the Accounting and Financial Controlling Division.

2. BASIS OF PREPARATION

a) Statement of compliance

The consolidated and separate financial statements have been prepared in accordance with Order no. 27/2010 of the National Bank of Romania and subsequent amendments, which require that these consolidated and separate financial statements are prepared in accordance with International Financial Reporting Standards as endorsed by the European Union ("IFRS"). The accounting records of the Bank are maintained in RON in accordance with the Romanian accounting law and the National Bank of Romania banking regulations.

Starting with 2012, the National Bank of Romania issued regulations through which the International Financial Reporting Standards as adopted by the European Union ("IFRS") become basis of accounting for banks. As such the statutory accounts of the Bank and of Raiffeisen Banca pentru Locuinte are in line, in all material respects, with these standards.

The non – banking subsidiaries, associates and joint ventures prepare financial statements in accordance with the Romanian accounting law and the National Bank of Romania banking regulations ("statutory accounts").

These accounts have been restated to reflect the existing differences between the statutory accounts and IFRS. Accordingly, such adjustments have been made to the statutory accounts as have been considered necessary to bring the financial statements into line, in all material respects, with IFRS.

b) Basis of measurement

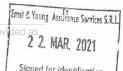

The accounting policies adopted are consistent with those of the previous financial year except for the following amended IFRSs which have been adopted by the Group as of 1 January 2020:

Conceptual Framework in IFRS standards

The IASB issued the revised Conceptual Framework for Financial Reporting on 29 March 2018. The Conceptual Framework sets out a comprehensive set of concepts for financial reporting, standard setting, guidance for preparers in developing consistent accounting policies and assistance to others in their efforts to understand and interpret the standards. IASB also issued a separate accompanying document, Amendments to References to the Conceptual Framework in IFRS Standards, which sets out the amendments to affected standards in order to update references to the revised Conceptual Framework. Its objective is to support transition to the revised Conceptual Framework for companies that develop accounting policies using the Conceptual Framework when no IFRS Standard applies to a particular transaction. For preparers who develop accounting policies based on the Conceptual Framework, it is effective for annual periods beginning on or after 1 January 2020.

• IFRS 3: Business Combinations (Amendments)

The IASB issued amendments in Definition of a Business (Amendments to IFRS 3) aimed at resolving the difficulties that arise when an entity determines whether it has acquired a business or a group of assets. The Amendments are effective for business combinations for which the acquisition date is in the first annual reporting period beginning on or after 1 January 2020 and to asset acquisitions that occur on or after the beginning of that period, with earlier application permitted. Management has assessed that there is no impact from this amendment as of 1 January 2021.

2. BASIS OF PREPARATION (continued)

IAS 1 Presentation of Financial Statements and IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors: Definition of 'material' (Amendments)

The Amendments are effective for annual periods beginning on or after 1 January 2020 with earlier application permitted. The Amendments clarify the definition of material and how it should be applied. The new definition states that, 'Information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements, which provide financial information about a specific reporting entity'. In addition, the explanations accompanying the definition have been improved. The Amendments also ensure that the definition of material is consistent across all IFRS Standards. Management has assessed that there is no impact from this amendment as of 1 January 2021.

Interest Rate Benchmark Reform - IFRS 9, IAS 39 and IFRS 7 (Amendments)

In September 2019, the IASB issued amendments to IFRS 9, IAS 39 and IFRS 7, which concludes phase one of its work to respond to the effects of Interbank Offered Rates (IBOR) reform on financial reporting. The amendments published, deal with issues affecting financial reporting in the period before the replacement of an existing interest rate benchmark with an alternative interest rate and address the implications for specific hedge accounting requirements in IFRS 9 Financial Instruments and IAS 39 Financial Instruments: Recognition and Measurement, which require forward-looking analysis. The amendments provide temporary reliefs, applicable to all hedging relationships that are directly affected by the interest rate benchmark reform, which enable hedge accounting to continue during the period of uncertainty before the replacement of an existing interest rate benchmark with an alternative nearly riskfree interest rate. There are also amendments to IFRS 7 Financial Instruments: Disclosures regarding additional disclosures around uncertainty arising from the interest rate benchmark reform. The amendments are effective for annual periods beginning on or after 1 January 2020 and must be applied retrospectively. Phase two (ED) focuses on issues that could affect financial reporting when an existing interest rate benchmark is replaced with a risk-free interest rate (an RFR). As of 1 January 2021, the uncertainty generated by the replacement of the existing interest rate benchmark did not affect the hedge accounting relationships. This is due to the fact that the financial instruments designated for hedge accounting are linked to ROBOR and EURIBOR index. On one hand EURIBOR will continue to be public even after January 1, 2022, while ROBOR index does not fall within the interest rate benchmark reform.

c) Functional and presentation currency

The elements included in the financial statements of each Group entity are evaluated by using the currency of the primary economic envnanciare ironment in which the entity operates ("functional currency"). These consolidated and separate financial statements are presented in Romanian Lei ("RON"), which is the functional and presentation currency of the Bank, rounded to the nearest thousand.

d) Use of estimates and judgments

The preparation of consolidated and separate financial statements in accordance with IFRS as endorsed by the EU requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on the historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions of accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods. The management judgments in applying accounting policies which have a significant impact on the consolidated and separate financial statements as well as highly uncertain estimates are disclosed in Note 6.

Emst 2 Young Assurance Services S.R.L.

Signed for identification

3. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies set out below have been applied consistently to all periods presented in these consolidated and separate financial statements and have been applied consistently by the Group entities.

a) Basis of consolidation

(i) Subsidiaries

Subsidiaries are entities controlled by the Bank. Control exists when an entity has the power to govern, directly or indirectly, the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that are exercisable or convertible are taken into account. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

The Bank holds:

- 99.99% (2019: 99.99%) interest in Raiffeisen Leasing IFN S.A.;
- 99.99% (2019: 99.99%) interest in Aedificium Banca Pentru Locuinte S.A.
- 99.99% (2019: 99.99%) investment in Raiffeisen Asset Management S.A., an asset management company with the purpose of administrating fund.

During 2020, ICS Raiffeisen Leasing S.R.L. from the Republic of Moldova, a company held 100% by Raiffeisen Leasing IFN S.A., has ceased its activity and has been liquidated.

During 2019, the Group acquired 66.66% of the share capital in Raiffeisen Banca pentru Locuinte S.A., an entity exclusively dedicated to saving and lending business. Before this acquisition, the Group owned 33.32% shares in this equity participation which was previously classified as joint venture. After the acquisition, the subsidiary's name changed into Aedificium Banca pentru Locuinte S.A.

The Bank has consolidated the financial statements of its subsidiaries in accordance with IFRS 10 "Consolidated Financial Statements".

(ii) Joint venture

The Group does not hold any joint ventures (2019: nil).

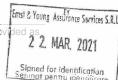

(iii) Associates

The Bank holds:

- 33.33% (2019: 33.33%) interest in Fondul de Garantare a Creditului Rural IFN S.A.
- 33.33% (2019: 0%) interest in CIT One S.R.L.

Associates are those entities in which the Group has significant influence, but not control, over the financial and operating policies.

The Group accounts proportionately for the share of gain or loss from its associates in accordance to IFRS 11 "Investments in Associates". The consolidated financial statements include the Group's share of the total recognized gains and losses of associates and joint ventures on an equity accounting basis, from the date that significant influence commences until the date that significant influence ceases (see Note 25). When the Group's share of losses exceeds its interest in an associate, the Group's carrying amount is reduced to nil and recognition of further losses is discontinued except to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of an associate. After application of the equity method, including recognizing the associate's losses, the investor determines whether it is necessary to recognize any additional impairment loss with respect to the investor's net investment in the associate.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(iv) Transactions eliminated on consolidation

Intra-Group balances and transactions, and any unrealized gains arising from intra-Group transactions (except for the gains or losses from foreign exchange differences related to these transactions), have been eliminated from the consolidated financial statements. Unrealized gains arising from transactions with associates and jointly controlled entities are eliminated to the extent of the Group's interest in that entity. Unrealized losses are eliminated in the same way as unrealized gains, but only to the extent that there is no evidence of impairment.

b) Foreign Currency

Foreign currency transactions

Transactions in foreign currencies are translated to RON at the official exchange rates from the transaction date. Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the exchange rate at that date. The foreign exchange gain or loss on monetary items is the difference between the amortized cost in the functional currency at the beginning of the period, adjusted for effective interest and payments during the period, and the amortized cost in foreign currency translated at the exchange rate at the end of the period. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Foreign currency differences arising on settlement are recognized in profit or loss, except for differences arising from the equity instruments measured at fair value through other comprehensive income.

c) Interest income and expense

Interest income and expense are recognized in the consolidated and separate statement of comprehensive income using the effective interest rate method for financial instruments measured at amortised cost and financial assets measured at FVOCI.

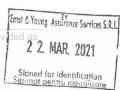

Interest income is calculated by applying the effective interest rate to the gross carrying amount of financial assets other than credit-impaired assets.

When a financial asset becomes credit-impaired and is, therefore, regarded as 'Stage 3', the Bank calculates interest income by applying the effective interest rate to the net amortised cost of the financial asset, as required by IAS 1. If the financial assets cures and is no longer credit-impaired, the Bank reverts to calculating interest income on a gross basis.

For purchased or originated credit-impaired (POCI) financial assets, the Bank calculates interest income using the credit-adjusted EIR and applying that rate to the amortised cost of the asset. The credit-adjusted EIR is the interest rate that, at original recognition, discounts the estimated future cash flows (including credit losses) to the amortised cost of the POCI assets.

The effective interest rate is the rate that exactly discounts the estimated future cash payments and receipts through the expected life of the financial asset or liability (or, where appropriate, a shorter period) to the carrying amount of the financial asset or liability. For the effective interest rate computation, the Group estimates the future cash flows by taking into account the contractual terms of each financial instrument, however it does not account for future credit losses. The calculation of the effective interest rate includes all fees and commissions paid or received, transaction costs and discounts or premiums that are an integral part of the effective interest rate.

The effective interest rate method is a method of calculating the amortized cost of loans and advances to customers whereby up-front and management fees received between parties to the contract and origination costs should be integral part of the effective interest rate and should be amortized and recognized as interest income over the relevant period.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Interest income and expense on all trading assets and liabilities are presented together with all other changes in the fair value of trading assets and liabilities in net trading income.

d) Fees and commissions

Fees and commissions income arises on financial services provided by the Group including commitment fees, card fees, cash management services, brokerage services, investment advice and financial planning, investment banking services, project and structured finance transactions, and asset management services.

Other fees and commissions income arising on the financial services provided by the Group including cash management services, brokerage services, investment advice, financial planning, investment banking services are recognized in the consolidated and separate statement of comprehensive income on the accrual basis i.e. when the corresponding service is provided. Other fees and commissions expense relates mainly to transaction and service fees, which are expensed as the services are received.

Other fees and commissions income and expenses corresponding to saving-lending products, which are not part of the effective interest rate of the financial instruments, are recognized when the related services are provided.

e) Net trading income

Net trading income comprises gains and losses from trading assets and liabilities and includes all realized and unrealized fair value changes, interests, dividends and foreign exchange differences.

f) Net gain/loss from other financial instruments at fair value

Net gain/loss from other financial instruments at fair value arises from derivatives held for risk management purposes and financial assets and liabilities designated at fair value through profit or loss and include all realized and unrealized fair value changes, interests, dividends and foreign exchange differences.

g) Dividends

Dividend income is recognized in the consolidated and separate statement of comprehensive income when the right to receive the income is established. Usually, this is the ex-dividend date for equity securities. Dividends are reflected as a component of other operating income based on the underlying classification of the equity instrument.

Tax on dividends is recognized at the same time as the payment of the related dividends and is due in the following month.

Dividends to be distributed by the Bank or Group are treated as an appropriation of profit in the period they are declared and approved by the General Shareholders Meeting.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

h) Lease payments

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. Short term leases are those which have, at the commencement date, a lease term of 12 months or less. Leases of low-value assets are those for which the underlying asset, when new, is of low value, the threshold chosen in this respect being EUR 5,000. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

At the commencement date of the lease, the Group recognises lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (less any lease incentives receivables), variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include payments of penalties for terminating the lease, if the lease term reflects exercising the option to terminate.

i) Income tax

Income tax for the year comprises current and deferred tax. Income tax is recognized in profit or loss or equity except to the extent that it relates to items recognized directly in equity or in other comprehensive income. Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax is determined using the balance sheet method for temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax is not recognized for the goodwill from transactions that are not a business combination and that affect neither accounting nor taxable profit. Deferred tax is measured at the tax rates which are expected to be applied to the temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities against current tax assets and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against which the asset can be used. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

j) Financial instruments

(i) Classification

According to IFRS 9, classification of financial assets is based on the entity's business model (portfolio perspective) and the contractual cash flow characteristics of the individual financial asset.

The main classification categories for financial assets are:

- a. amortized cost;
- b. fair value through other comprehensive income (FVOCI) with gains or losses recycled to profit or loss on derecognition:
- equity instruments at FVOCI, with no recycling of gains or losses on profit or loss on derecognition;
- d. fair value through profit or loss (FVTPL).

a. Amortised cost

A financial asset is measured at amortized cost if both of the following conditions are met:

- The asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows;
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding (herein after referred to as the "SPPI test").

b. FVOCI

A financial asset that is a debt instrument is classified as subsequently measured at FVOCI if it is held within a business model whose objective is both collecting contractual cash flows and selling financial assets and meets the SPPI test.

c. FVTPL

All other financial assets – i.e. financial assets that do not meet the criteria for classification as subsequently measured at either amortised cost or FVOCI – are classified as subsequently measured at fair value, with changes in fair value recognised in profit or loss.

In addition the Bank has the option at initial recognition to irrevocably designate a financial asset that is a debt instrument as at FVTPL if doing so eliminates or significantly reduces a measurement or recognition inconsistency – i.e. an 'accounting mismatch' – that would otherwise arise from measuring assets or liabilities, or recognising the gains and losses on them, on different bases.

Further requirements for a 'significant reduction of the accounting mismatch' or a minimum value of reduction are not prescribed by IFRS 9. For practical purpose, the Bank does not need to originate all of the assets and liabilities giving rise to the measurement or recognition mismatch at exactly the same time. A reasonable delay is permitted, provided that each asset or liability is designated as at FVTPL at its initial recognition and, at that time, any remaining transactions are expected to occur.

d. FVOCI Election for Equity Instruments

At initial recognition, an entity may make an irrevocable election to present in OCI subsequent changes in the fair value of an investment in an equity instrument that is neither held for trading nor contingent consideration recognised by an acquirer in a business combination to which IFRS 3 Business Combinations applies.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

An equity instrument is a contract that evidences a residual interest in an entity's asset after deducting all of its liabilities. The term "entity" includes individuals, partnerships, incorporated bodies, trusts and government agencies. According to IAS 32, an equity instrument has to meet the following conditions cumulatively):

- ✓ No contractual obligation to deliver cash or another financial asset to another entity or exchange financial assets or liabilities under unfavourable conditions with another entity and
- ✓ The instrument evidences a residual interest in the net assets of the issuer.

Equity instruments do not have contractual cash flows which are solely payments of interest and principal. Consequentially, equity instruments will never pass the SPPI test and are always classified as either FVTPL or FVOCI.

Equity instruments that are held for trading are required to be classified as at FVTPL. For all other equity investments (e.g.: strategic investments in clearing houses), management may irrevocably elect to present subsequent changes in the fair value of these equity investments in other comprehensive income (OCI). This election is made on an instrument-by instrument (i.e. share-by-share) basis.

Dividends on such investments are recognised in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Such circumstances will be limited because such investment will not be accounted for in accordance with IFRS 9 if the Bank has the ability to control or significantly influence the dividend policy of the investment.

Amounts presented in OCI shall not be recycled to profit or loss when an equity instrument is derecognised (e.g. due to a sale), nor are there any impairment requirements. However, the Bank may transfer the cumulative gain or loss within equity.

Financial liabilities, other than loan commitments and financial guarantees, are measured at amortised cost or at FVPL when they are held for trading and derivative instruments or the fair value designation is applied.

All financial liabilities are classified as subsequently measured at amortised cost, except for the following items which are measured at FVTPL:

- Financial liabilities that are held for trading including derivatives;
- Financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies;
- Financial guarantees and below market rate interest loan commitments;
- Contingent consideration recognized by an acquirer in a business combination:
- Financial liabilities that are designated as at FVTPL on initial recognition.

Financial guarantee contracts and commitments to provide a loan at a below-market interest rate have specific guidance under IFRS 9. They have to be measured at the higher of:

- a. the amount of provision for expected credit losses under the normal IFRS 9 impairment model and
- b. the amount initially recognized, less the cumulative amount of income recognized in accordance with the principles of IFRS 15.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(ii) Business model assessment

The term 'business model' refers to the way an entity manages its financial assets in order to generate cash flows. That is, the entity's business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets or both.

A business model assessment is needed for financial assets that meet the SPPI test, to determine whether they meet the criteria for classification as subsequently measured at amortised cost or FVOCI. Financial assets that do not meet the SPPI test are classified as at FVTPL irrespective of the business model in which they are held – except for investments in equity instruments, for which an entity may elect to present gains and losses in FVOCI.

The business model is determined at a level that reflects the way groups of financial assets are managed together to achieve a particular business objective. An entity's business model does not depend on management's intentions for an individual instrument. Accordingly, this condition is not an instrument- by-instrument approach to classification, but should be determined at a higher level of aggregation.

Three business models are allowed under IFRS 9:

a. Hold-to-collect

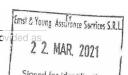

Financial assets in a hold-to-collect business model are managed to realise cash flows by collecting payments of principal and interest over the life of the instruments. An entity need not hold all of these assets until maturity. Therefore, a business model's objective can be to hold financial assets to collect contractual cash flows even when some sales of financial assets have occurred or are expected to occur.

Sales that may be consistent with the hold-to-collect business model are performed in the following situations:

- The sales are due to an increase in the credit risk of a financial asset;
- The sales are infrequent (even if significant), or are insignificant individually and in aggregate (even if frequent);
- The sales take place close to the maturity of the financial asset and the proceeds from the sales approximate the collection of the remaining contractual cash flows.

The Group considers that the total sales per annum are insignificant if they do not exceed 10% of the prior three years average portfolio. The average considers closing balance figures; in case of new portfolios the Group applies the 10% threshold on periods less than 3 years.

The hold-to-collect portfolio is applicable to: Loans and advances to customers, Loans and advances to banks and to a bond portfolio, part of the liquidity buffer and whose main objective is to safeguard in stress times the continuity of the bank's activity.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

b. Hold-to-collect and Sale

An entity may hold financial assets in a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets. In this type of business model, the entity's key management personnel have made a decision that both of these activities are integral to achieving the objective of the business model.

Examples of such a business model, given by IFRS 9, include:

- a financial institution holding financial assets to meet its everyday liquidity needs;
- an entity investing excess cash in short/long term instruments to hold but to sell when it has the need for capital expenditure;
- maintaining a particular interest yield profile.

Within the financial assets portfolio of the Bank, the "Hold-to-collect and Sale" Business Model is applicable to the bond portfolios, managed for liquidity needs. The portfolios are composed of highly liquid assets and have the main objective meeting the liquidity needs and secondary to collect interest.

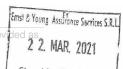

The target of these liquidity portfolios is to safeguard in stress times the continuity of the bank's activity, which sets the return objective in a secondary plan. The portfolios are managed based on a specific Investment Policy Statement (IPS) which imposes asset allocation restrictions based on certain criteria (central bank eligibility, credit risk, liquidity risk, concentration risk and market risk). The portfolio performance is monitored on a relative basis in risk-adjusted terms versus a benchmark.

c. Other

The objective of the business model is considered 'other' when it does not fall into one of the previous two categories discussed above. This would be the case where:

- a portfolio of financial assets is managed with the objective of realising cash flows through the sale of the financial assets in order to realise fair value changes arising from changes in credit spreads and yield curves. This results in active buying and selling and managing the instruments to realise fair value gains rather than to collect the contractual cash flows;
- a portfolio of financial assets that is managed and whose performance is evaluated on a fair value basis:
- a portfolio of financial assets meets the definition of held for trading;

The "Other" Business Model is applicable to the held for trading portfolio. Its strategy is to realize cash flows through sale of the assets or to manage the instruments actively on a fair value basis in order to realize fair value changes arising from changes in credit spreads and yield curves.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

(iii) The SPPI test

As a second step of its classification process the Bank assesses the contractual terms of financial to identify whether they meet the SPPI test. For this purpose, the contractual interest is defined as consideration for:

- time value of money;
- credit risk associated with the principal amount outstanding;
- other basic lending risks (for example liquidity);
- costs (for example administrative) and
- profit margin.

Time value of money is the element of interest that provides consideration for only the passage of time. In some cases, the time value of money element may be modified (imperfect). In this case it must be assessed if the contractual cash flows still represent solely payments of principal and interest, i.e. the modification term does not significantly alter the cash flows from a "perfect" benchmark instrument. This assessment is not an accounting policy choice and cannot be avoided simply by concluding that an instrument, in the absence of such an assessment, will be measured at fair value.

Both qualitative and quantitative approaches can be used to determine whether the time value of money element of the interest rate provides consideration for just the passage of time.

When assessing a financial asset with a modified time value of money element, the entity should compare the financial asset under assessment to the "perfect" ("benchmark") instrument (that is, the cash flows that would arise if the time value of money element was not modified).

If in any reasonably possible scenario, the difference between the cash flows of the benchmark instrument and the cash flows of the instrument under assessment are significantly different, its contractual cash flows are not considered SPPI and the instrument must be measured at FVTPL.

(iv) Financial assets and liabilities

Loans and advances to banks, loans and advances to customers, financial investments at amortised cost

The Bank only measures loans to banks, loans and advances to customers and other financial investments at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows:
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Derivatives recorded at fair value through profit or loss

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided that, in the case of a non-financial variable, it is not specific to a party to the contract (i.e., the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts expected to have a similar response to changes in market factors.
 - It is settled at a future date.

Derivatives are recorded at fair value and carried as assets when their fair value is positive and as liabilities when their fair value is negative. Changes in the fair value of derivatives are included in net trading income unless hedge accounting is applied.

Embedded derivatives

An embedded derivative is a component of a hybrid instrument that also includes a non-derivative host contract with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. An embedded derivative causes some or all of the cash flows that otherwise would be required by the contract to be modified according to a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided that, in the case of a non-financial variable, it is not specific to a party to the contract. A derivative that is attached to a financial instrument, but is contractually transferable independently of that instrument, or has a different counterparty from that instrument, is not an embedded derivative, but a separate financial instrument.

Derivatives embedded in financial assets are not separated from the non-financial host contracts; instead, the entire hybrid instrument is assessed for classification, based on the business model and SPPI assessments. Derivatives embedded in financial liabilities are accounted for separately from the non-financial host contracts.

Financial assets or financial liabilities held for trading

The Bank classifies financial assets or financial liabilities as held for trading when they have been purchased or issued primarily for short-term profit making through trading activities or form part of a portfolio of financial instruments that are managed together, for which there is evidence of a recent pattern of short-term profit taking. Held-for-trading assets and liabilities are recorded and measured in the statement of financial position at fair value. Changes in fair value are recognised in net trading income. Interest and dividend income or expense is recorded in net trading income according to the terms of the contract, or when the right to payment has been established.

Included in this classification are debt securities, equities, short positions and customer loans that have been acquired principally for the purpose of selling or repurchasing in the near term.

Debt instruments at FVOCI

The Bank measures debt instruments at FVOCI when both of the following conditions are met:

- The instrument is held within a business model, the objective of which is achieved by both collecting contractual cash flows and selling financial assets;
- The contractual terms of the financial asset meet the SPPI test.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

FVOCI debt instruments are subsequently measured at fair value with gains and losses arising due to changes in fair value recognised in OCI. Interest income and foreign exchange gains and losses are recognised in profit or loss in the same manner as for financial assets measured at amortised cost. Where the Bank holds more than one investment in the same security, they are deemed to be disposed of on a weighted average cost basis. On derecognition, cumulative gains or losses previously recognised in OCI are reclassified from OCI to profit or loss.

Equity instruments at FVOCI

Upon initial recognition, the Group elected to classify irrevocably its equity investments, other than subsidiaries, joint ventures and associates as equity instruments at FVOCI with no recycling of gains or losses on profit or loss on derecognition.

Gains and losses on these equity instruments are never recycled to profit. Dividends are recognised in profit or loss as other operating income when the right of the payment has been established, except when the Bank benefits from such proceeds as a recovery of part of the cost of the instrument, in which case, such gains are recorded in OCI. Equity instruments at FVOCI are not subject to an impairment assessment.

Debt issued and other borrowed funds

After initial measurement, debt issued and other borrowed funds are subsequently measured at amortised cost. Amortised cost is calculated by taking into account any discount or premium on issue funds, and costs that are an integral part of the EIR.

Financial assets and financial liabilities at fair value through profit or loss

Financial assets and financial liabilities in this category are those that are not held for trading and have been either designated by management upon initial recognition or are mandatorily required to be measured at fair value. Management only designates an instrument at FVPL upon initial recognition when one of the following criteria is met. Such designation is determined on an instrument-by-instrument basis:

- The designation eliminates, or significantly reduces, the inconsistent treatment that would otherwise arise from measuring the assets or liabilities or recognising gains or losses on them on a different basis:
- The liabilities (and assets until 1 January 2018 under IAS 39) are part of a group of financial liabilities (or financial assets, or both under IAS 39), which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management or investment strategy;
- The liabilities (and assets until 1 January 2018 under IAS 39) containing one or more embedded derivatives, unless they do not significantly modify the cash flows that would otherwise be required by the contract, or it is clear with little or no analysis when a similar instrument is first considered that separation of the embedded derivative(s) is prohibited.

Financial assets and financial liabilities at FVPL are recorded in the statement of financial position at fair value. Changes in fair value are recorded in profit or loss with the exception of movements in fair value of liabilities designated at FVPL due to changes in the Bank's own credit risk. Such changes in fair value are recorded in the Own credit reserve through OCI and do not get recycled to the profit or loss. Interest earned or incurred on instruments designated at FVPL is accrued in interest income or interest expense, respectively, using the EIR, taking into account any discount/ premium and qualifying transaction costs being an integral part of instrument.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Interest earnt on assets mandatorily required to be measured at FVPL is recorded using effective interest rate. Dividend income from equity instruments measured at FVPL is recorded in profit or loss as other operating income when the right to the payment has been established.

Financial guarantees, letters of credit and undrawn loan commitments

The Bank issues financial guarantees, letters of credit and loan commitments. Financial guarantees are initially recognised in the financial statements (within *Provisions*) at fair value, being the premium received. Subsequent to initial recognition, the Bank's liability under each guarantee is measured at the higher of the amount initially recognised less cumulative amortisation recognised in the income statement, and an ECL provision.

The premium received is recognised in the income statement in *Net fees and commission income* on a straight line basis over the life of the guarantee.

The nominal contractual value of financial guarantees, letters of credit and undrawn loan commitments, where the loan agreed to be provided is on market terms, are not recorded on in the statement of financial position.

(v) Recognition

The Group initially recognizes financial assets and liabilities at fair value, on initial recognition date. This is the date at which the Group becomes a party to the contractual provisions of the instrument.

Initial recognition date is important given that:

- benchmark test should be performed at the initial recognition:
- it is the date on which the classification assessment is performed (i.e.: the contractual characteristics at this date will trigger the classification and measurement of an exposure);
- the credit risk variation is measured from initial recognition. Therefore, the assessment whether there was an increase / significant deterioration in credit risk at each reporting date is performed compared to the conditions existing at initial recognition date;
- at the initial recognition the POCI assessment is performed hence the Bank will recognise a POCI asset if the client is in default at the initial recognition date;
- at the initial recognition date the exposure needs to be recognised at fair value and the EIR or credit adjusted EIR is calculated.

The origination date is different from the initial recognition date when subsequent to origination, the contract can be significantly modified through either a commercial renegotiation or a restructuring operation.

(vi) Derecognition

Derecognition is the term used for the removal of an asset or liability from the balance sheet. Derecognition appears when:

- the rights to the cash flows from the asset expire,
- the rights to the cash flows from the asset and substantially all risks and rewards of ownership of the asset are transferred, or
- an obligation to transfer the cash flows from the asset is assumed and substantially all risks and rewards are transferred.

If the entity retains control of the asset but does not retain or transfer substantially all the risks and rewards, the asset is recognised to the extent of the entity's continuing involvement.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

A financial liability is removed from the balance sheet only when it is extinguished -i.e. when the obligation specified in the contract is discharged or cancelled, or expires. A transaction is accounted for as a collateralised borrowing if the transfer does not satisfy the conditions for derecognition.

When assessing whether or not to derecognise a loan to a customer due to a modification in terms and conditions, amongst others, the Group considers the following factors:

- Change in currency of the loan;
- Change in reimbursement schedule (e.g. extension of the remaining term of 50% and more than 2 years);
- Prolongation at contractual maturity / increase / decrease in an existing loan facility under market conditions;
- Introduction or elimination of a clause that would result in different classification.

In case the modification of terms and conditions does not result in derecognition, the Group records a modification gain or loss, to the extent that an impairment loss has not already been recorded.

(vii) Offsetting

Financial assets and liabilities are set off and the net amount presented in the consolidated and separate statement of financial position when, and only when, the Group has a legal right to set off the amounts and intends either to settle on a net basis or to realize the asset and settle the liability simultaneously.

Income and expenses are presented on a net basis only when permitted by the accounting standards, or for gains and losses arising from a group of similar transactions such as in the Group's trading activity.

(viii) Fair value measurement

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Group has access at that date. The fair value of a liability reflects the effect of non-performance risk.

All estimates and judgments used in fair value measurement are described in Note 6. Unquoted equity instruments for which a reliable estimate of the fair value cannot be made are measured at cost and periodically tested for impairment.

(ix) Identification and measurement of impairment

The adoption of IFRS 9 has fundamentally changed the Bank's loan loss impairment method by replacing IAS 39's incurred loss approach with a forward-looking ECL approach. From 1 January 2018, the Bank has been recording the allowance for expected credit losses for all loans and other debt financial assets not held at FVPL, together with loan commitments and financial guarantee contracts, in this section all referred to as 'financial instruments'. Equity instruments are not subject to impairment under IFRS 9.

The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss (12mECL).

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Both LTECLs and 12mECLs are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments.

The Bank has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

Based on the above process, the Bank groups its loans into Stage 1, Stage 2, Stage 3 and POCI, as described below:

- Stage 1: When loans are first recognised, the Bank recognises an allowance based on 12mECLs.
 Stage 1 loans also include facilities where the credit risk has improved and the loan has been reclassified from Stage 2.
- Stage 2: When a loan has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. Stage 2 loans also include facilities, where the credit risk has improved and the loan has been reclassified from Stage 3.
- Stage 3: Loans considered credit-impaired. The bank records an allowance for the LTECLs.
- POCI: Purchased or originated credit impaired (POCI) assets are financial assets that are credit
 impaired on initial recognition. POCI assets are recorded at fair value at original recognition and
 interest income is subsequently recognised based on a credit-adjusted EIR. ECLs are only
 recognised or released to the extent that there is a subsequent change in the expected credit
 losses.

Measurement of Expected Credit Losses

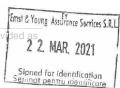

The measurement of expected credit losses reflects an unbiased and probability-weighted amount that is determined by evaluating a range of possible outcomes, the time value of money and reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

The measurement of the expected credit loss allowance for financial assets measured at amortised cost and fair value through other comprehensive income is an area that requires the use of complex models and significant assumptions about future economic conditions and credit behaviour. Significant judgements are required in applying the accounting requirements for measuring expected credit losses these are:

- Determining criteria for significant increase in credit risk;
- Choosing appropriate models and assumptions for the measurement of expected credit losses;
- Establishing the number and relative weightings of forward-looking scenarios for each type of product/market and the associated expected credit losses;
- Establishing groups of similar financial assets for the purposes of measuring expected credit losses.

Credit risk comes from the risk of suffering financial loss, should any of our customers, clients or market counterparties fail to fulfil their contractual obligations to the Group. Credit risk arises mainly from interbank, commercial and consumer loans and advances, and loan commitments arising from such lending activities, but can also arise from credit enhancement provided, such as, financial guarantees, letters of credit, and acceptances.

The Group is also exposed to other credit risks arising from investments in debt securities and other exposures arising from its trading activities ('trading exposures') including non-equity trading portfolio assets and derivatives as well as settlement balances with market counterparties and reverse repurchase agreements.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

The estimation of credit exposure for risk management purposes is complex and requires the use of models, as the exposure varies with changes in market conditions, expected cash flows and the passage of time. The assessment of credit risk of a portfolio of assets entails further estimations as to the likelihood of defaults occurring, of the associated loss ratios and of default correlations between counterparties. The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

• PD The Probability of Default represents the likelihood of a borrower defaulting on its financial obligation either over the next twelve months or over the remaining lifetime of the obligation.

Different models have been used to estimate the default profile of outstanding lending amounts and these can be grouped into the following categories:

- Sovereign, local and regional governments and insurance companies: The default profile is generated using a transition matrix approach;
- Corporate customers, project finance and financial institutions: The default profile is generated using a parametric survival regression approach:
- Retail lending and mortgage loans: The default profile is generated using parametric survival regression in competing risk frameworks.

Forward-looking information is also incorporated into the probability of default in all models described above.

• EAD The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments.

Exposure at default is based on the amounts the Group expects to be owed at the time of default, over the next 12 months or over the remaining lifetime. The 12-month and lifetime EADs are determined based on the expected payment profile, which varies by product type. For amortising products and bullet repayment loans, this is based on the contractual repayments owed by the borrower over a 12-month or lifetime basis, where relevant early repayment/refinance assumptions are also considered in the calculation.

For revolving products, the exposure at default is predicted by taking current drawn balance and adding a credit conversion factor which allows for the expected drawdown of the remaining limit by the time of default. In the limited circumstances where some inputs are not fully available benchmarking of inputs is used for the calculation.

• LGD The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral. It is usually expressed as a percentage of the EAD.

Different models have been used to estimate the loss given default of outstanding lending amounts and these can be grouped into the following categories:

- Sovereign: the loss given default is found by using market implied sources.
- Corporate customers, project finance, financial institutions, local and regional governments, insurance companies: the loss given default is generated by discounting cash flows collected during the workout process. Forward-looking information is incorporated into the loss given default using the Vasicek model.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

- Retail mortgages and other retail lending: the loss given default is generated by stripping the downturn adjustments and other margins of conservatism from the regulatory loss given default. Forward-looking information is incorporated into the loss given default using various satellite models.

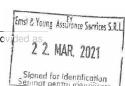

In the limited circumstances where some inputs are not fully available alternative recovery models, benchmarking of inputs and expert judgement is used for the calculation.

When estimating the ECLs, the Bank considers multiple scenarios. Each of these is associated with different PDs, EADs and LGDs. When relevant, the assessment of multiple scenarios also incorporates how defaulted loans are expected to be recovered, including the probability that the loans will cure and the value of collateral or the amount that might be received for selling the asset.

With the exception of credit cards and other revolving facilities, the maximum period for which the credit losses are determined is the contractual life of a financial instrument unless the Bank has the legal right to call it earlier.

The mechanics of the ECL method are summarised below:

- Stage 1: The 12mECL represents the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Bank calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD and discounted by an approximation to the original EIR. This calculation is made for each of the multiple scenarios, as explained above.
- Stage 2: When a loan has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. The mechanics are similar to those explained above, including the use of multiple scenarios, but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.
- Stage 3: For loans considered credit-impaired, the Bank recognises the lifetime expected credit losses for these loans. The method is similar to that for Stage 2 assets, with the PD set at 100%.
- POCI assets are financial assets that are credit impaired on initial recognition. The Bank only recognises the cumulative changes in lifetime ECLs since initial recognition, based on a probability-weighting of the four scenarios, discounted by the credit adjusted EIR.
- Loan commitments and letters of credit: When estimating LTECLs for undrawn loan commitments, the Bank estimates the expected portion of the loan commitment that will be drawn down over its expected life. The ECL is then based on the present value of the expected shortfalls in cash flows if the loan is drawn down, based on a probability-weighting of the scenarios. The expected cash shortfalls are discounted at an approximation to the expected EIR on the loan. For credit cards and revolving facilities that include both a loan and an undrawn commitment, ECLs are calculated and presented together with the loan. For loan commitments and letters of credit, the ECL is recognised within *Provisions*.
- Financial guarantee contracts: The Bank's liability under each guarantee is measured at the higher of the amount initially recognised less cumulative amortisation recognised in the income statement, and the ECL provision. For this purpose, the Bank estimates ECLs based on the present value of the expected payments to reimburse the holder for a credit loss that it incurs. The shortfalls are discounted by the risk-adjusted interest rate relevant to the exposure. The calculation is made using a probability-weighting of the scenarios. The ECLs related to financial guarantee contracts are recognised within *Provisions*.

3. SIGNIFICANT ACCOUNTING POLICIES (continued).

Debt instruments measured at fair value through OCI

The ECLs for debt instruments measured at FVOCI do not reduce the carrying amount of these financial assets in the statement of financial position, which remains at fair value. Instead, an amount equal to the allowance that would arise if the assets were measured at amortised cost is recognised in OCI as an accumulated impairment amount, with a corresponding charge to profit or loss. The accumulated loss recognised in OCI is recycled to the profit or loss upon derecognition of the assets.

Purchased or originated credit impaired financial assets (POCI)

For POCI financial assets, the Bank only recognises the cumulative changes in LTECL since initial recognition in the loss allowance.

Significant Increase in Credit Risk

The Group considers a financial instrument to have experienced a significant increase in credit risk when one or more of the following quantitative, qualitative or backstop criteria have been met:

· Quantitative Criteria

The Group uses quantitative criteria as the primary indicator of significant increase in credit risk for all material portfolios. For quantitative staging the Group compares the lifetime PD curve at measurement data with the forward lifetime PD curve at the date of initial recognition. For the estimation of the lifetime PD curve at the date of initial recognition assumptions are made about the structure of the PD curve. On the one hand in the case of highly rated financial instruments it is assumed that the PD curve will deteriorate over time. On the other hand for low rated financial instruments it is assumed that the PD curve will improve over time. The degree of improvement or deterioration will depend on the level of the initial rating. In order to make the two curves comparable the PDs are scaled down to annualized PDs. In general a significant increase in credit risk is considered to have occurred with a relative increase in the PD of up to 250% although this amount can be lower due to several limiting factors such as closeness to maturity and portfolios of products.

The Group is not aware of any generally accepted market practice for the level at which a financial instrument has to be transferred to Stage 2. From this perspective it is expected that the increase in PD at reporting date which is considered significant will develop over a period of time as a result of an iterative process between market participants and supervisors.

· Qualitative Criteria

The Group uses qualitative criteria as a secondary indicator of significant increase in credit risk for all material portfolios. A movement to Stage 2 takes place when the criteria below are met.

For sovereign, bank, corporate and project finance portfolios, if the borrower meets one or more of the following criteria:

- External market indicators
- Changes in contract terms
- Changes to management approach
- Expert judgement

The assessment of significant increase in credit risk incorporates forward-looking information and is performed on a quarterly basis at a deal level for all non-retail portfolios held by the Group.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

For retail portfolios, if the borrower meets one or more of the following criteria:

- Forbearance, which refers to concessions made to the borrower by the lender, for economic or contractual reasons when the borrower is experiencing financing difficulties, but which the lender would not otherwise grant;
- Expert judgement.

The assessment of significant increase in credit risk incorporates forward-looking information and is performed on a monthly basis at a deal level for all retail portfolios held by the Group.

Backstop

A backstop is applied and the financial instrument considered to have experienced a significant increase in credit risk if the borrower is more than 30 days past due on its contractual payments. At the same time, the Group adhered to the rebuttable presumption that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due.

Definition of Default and Credit-Impaired Assets

The Group's default definition complies with the guidelines on the definition of default published by the European Banking Authority (EBA/GL/2016/07).

The Group defines a financial instrument as in default, which is fully aligned with the definition of creditimpaired, when it meets one or more of the following criteria:

· Quantitative Criteria

The borrower is more than 90 days past due on its contractual payments and no attempt is made to rebut the presumption that financial assets which are more than 90 days past due are to be shown in Stage 3.

· Qualitative Criteria

The borrower meets unlikeliness to pay criteria, which indicates the borrower is in significant financial difficulty. These are instances where:

- The borrower is deceased;
- The borrower is insolvent (insolvency for private individuals is according to provisions of Law no.151/2015, which is applicable starting with 2018);
- The borrower is in breach of financial covenants;
- The borrower is in default on other Group exposures, due to contamination effect;
- An active market for that financial asset has disappeared because of financial difficulties:
- Concessions have been made by the lender relating to the borrower's financial difficulty;
- It is becoming probable that the borrower will enter bankruptcy;
- Financial assets are purchased or originated at a deep discount that reflects the incurred credit losses.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

The criteria above have been applied to all financial instruments held by the Group and are consistent with the definition of default used for internal credit risk management purposes. The default definition has been applied consistently to model the Probability of Default (PD), Exposure at Default (EAD) and Loss given Default (LGD) throughout the Group's expected loss calculations.

An instrument is considered to no longer be in default (i.e. to have cured) when it no longer meets any of the default criteria for a consecutive period of a minimum of 3 months or longer for distressed restructured exposures. This period of 3 months has been determined based on an analysis which considers the likelihood of a financial instrument returning to default status after cure using different possible cure definitions.

Forward Looking Information

The assessment of significant increase in credit risk and the calculation of expected credit losses both incorporate forward-looking information. The Group has performed historical analysis and identified the key economic variables impacting credit risk and expected credit losses for each portfolio.

These economic variables and their associated impact on the probability of default, loss given default and exposure at default vary by category type. Expert judgment has also been applied in this process. Forecasts of these economic variables (the "base economic scenario") are provided by Raiffeisen Research on a quarterly basis and provide the best estimate view of the economy over the next three years. After three years, to project the economic variables out for the full remaining lifetime of each instrument, a mean reversion approach has been used, which means that economic variables tend to either a long run average rate or a long run average growth rate until maturity. The impact of these economic variables on the probability of default, loss given default and exposure at default has been determined by performing statistical regression to understand the impact changes in these variables have had historically on default rates and on the components of loss given default and exposure at default.

In addition to the base economic scenario, Raiffeisen Research also provides a best case and worst case scenario along with scenario weightings to ensure non-linearities are captured. The Group has concluded that three scenarios or less appropriately captured non-linearity. The scenario weightings are determined by a combination of statistical analysis and expert credit judgement, taking account of the range of possible outcomes each chosen scenario is representative of. The probability-weighted expected credit losses are determined by running each scenario through the relevant expected credit loss model and multiplying it by the appropriate scenario weighting.

As with any economic forecasts, the projections and likelihoods of occurrence are subject to a high degree of inherent uncertainty and therefore the actual outcomes may be significantly different to those projected. The Group considers these forecasts to represent its best estimate of the possible outcomes and cover any potential non-linearities and asymmetries within the Group's different portfolios.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Sensitivity analysis

The most significant assumptions affecting the expected credit loss allowance are as follows:

- · Corporate portfolios
 - · Gross domestic product
 - Unemployment rate.
- · Retail portfolios
 - Gross domestic product
 - Exchange rate EUR/RON
 - ROBOR 3M
 - Unemployment rate.

For details regarding the results of the sensitivity analysis performed, refer to *Note 6*.

Discount Factor

In general for on balance sheet exposure which is not leasing or POCI the discount rate used in the expected credit loss calculation is the effective interest rate or an approximation thereof.

Collateral valuation

To mitigate its credit risks on financial assets, the Bank seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets and credit enhancements such as netting agreements. Collateral, unless repossessed, is not recorded on the Bank's statement of financial position.

However, the fair value of collateral affects the calculation of ECLs. It is generally assessed, at a minimum, at inception and re-assessed on an annual basis.

To the extent possible, the Bank uses active market data for valuing financial assets held as collateral. Other financial assets which do not have readily determinable market values are valued using models. Non-financial collateral, such as real estate, is valued based on data provided by third parties such as mortgage brokers, or based on housing price indices.

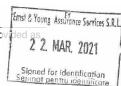

Write-offs

Financial assets are written off in their entirety only when the Bank has stopped pursuing the recovery. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to credit loss expense.

k) Hedge Accounting

The Group has elected, as a policy choice permitted under IFRS 9, to continue to apply hedge accounting in accordance with IAS 39.

The Group applies micro and macro fair value hedge. The Group's hedging objective refers explicitly to the interest rate risk exposure due to shifts in the corresponding benchmark rate. The credit risk exposure of the assets is not considered for hedging purposes.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

At inception, the Group formally documents how the hedging relationship meets the hedge accounting criteria. It also records the economic relationship between the hedged item and the hedging instrument, including the nature of the risk, the risk management objective and strategy for undertaking the hedge and the method that will be used to assess the effectiveness of the hedging relationship at inception and on an ongoing basis. In order to qualify for hedge accounting, a hedge relationship must be expected to be highly effective on a prospective basis and it needs to be demonstrated that it was highly effective in the previous designated period (i.e., one month).

A hedge is considered to be highly effective if the changes in fair value or cash flows attributable to the hedged risk are expected to be offset by the hedging instrument in a range of 80% to 125%. It is also necessary to assess, retrospectively, whether the hedge was highly effective over the previous one month period. The hedge accounting documentation includes the method and results of the hedge effectiveness assessments.

Prospective and retrospective effectiveness tests are conducted using the quantitative method of dollar offset. This consists in computing the ratio of the change in the clean, cumulated fair value of the hedging instrument to the change in the clean, cumulated fair value of the hedged item attributable to the hedged risk.

Hedge accounting ceases prospectively when any of the following events occur:

- the hedge no longer meets the hedge accounting criteria (for example it is no longer highly effective or its effectiveness is no longer measurable);
- > the hedged item is sold or settled;
- > the hedging instrument expires or is sold, terminated or exercised;
- the management decides to revoke the designation;

If a hedging relationship no longer meets the hedge effectiveness criteria or fails the materiality threshold mentioned above, hedge accounting ceases from the last date on which the hedge was considered to be effective, which will be the beginning of the period in which the hedge ceased to meet the effectiveness criteria or exceeded the materiality threshold.

If the entity determines that a certain event, change in circumstances/market disruption caused the hedging relationship to fail the effectiveness tests and demonstrates that the hedge was effective before the event or change in circumstances occurred, hedge accounting ceases from the date of the event or change in circumstances.

After derecognition of the hedging relationship, the future fair value changes of the derivative are further recognized in profit or loss under "Trading income", whereas the hedged item will be accounted for as it was before the hedging designation, without applying the hedge accounting rules—e.g. loans will return to amortized cost treatment. For the items for which the effective interest method is used, the previous hedging adjustments are amortized to profit or loss over the remaining life of the hedged item.

I) Cash and cash equivalents

For the purposes of the cash flow statement, cash and cash equivalents comprise: cash balances on hand, current accounts and other placements with the National Bank of Romania, nostro accounts and placements with other banks which have a short maturity of three months or less from the date of acquisition.

m) Property, plant and equipment

Recognition and measurement

Items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Costs include expenditures that are directly attributable to the acquisition of an asset. The cost of self-constructed assets includes the cost of materials and direct labour, any other costs directly attributable to bringing the asset to a working condition for its intended use, and the costs of dismantling and removing the items and restoring the site on which they are located. Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment.

Emst & Young Assurance Services S.R.I.

Covided as 2 MAR. 2021

Signed for identification

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

The costs with maintenance of property, plant and equipment are recognized in profit or loss account as they incur. Expenses generated by replacing a component of a property, plant and equipment item, including major repairs, are capitalized, if improve the future performance of the property, plant and equipment item.

Depreciation

Depreciation is recognized in profit or loss on a straight-line basis over the estimated useful lives of each item. Leased assets are depreciated over the shorter of the lease term and their useful lives. Land is not depreciated.

The estimated useful lives are as follows:

Buildings 50 years
Office equipment and furniture 5 years
Motor vehicles 5 years
Computer equipment 4 years

Depreciation methods, useful life and residual values are reassessed at each reporting date and adjusted if appropriate.

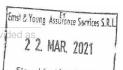

n) Intangible assets

Software

Software acquired by the Group is stated at cost less accumulated amortization and accumulated impairment losses. Expenditure on internally developed software is recognized as an asset when the Group is able to demonstrate its intention and ability to complete the development and use the software in a manner that will generate future economic benefits and can reliably measure the costs to complete the development. The capitalized costs of internally developed software include all costs directly attributable to developing the software and are amortized over its useful life.

Subsequent expenditure on software assets is capitalized only when it increases the future economic benefits embodied in the specific asset to which it relates.

All other expenditure is expensed as incurred. Amortization is recognized in profit or loss on a straight line basis over the estimated useful life of the software, from the date that it is available for use. The estimate useful life of software is between 1 and 8 years. Amortization methods, useful life and residual values are reassessed at each reporting date and adjusted if appropriate.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

o) Leased assets

Lessee: The Group recognises right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial indirect costs incurred and lease payments made at or before the commencement date less any incentives received. Right-of-use assets are depreciated on a straight line basis over the lease term.

The right-of-use assets are presented within *note 30* and are subject to impairment in line with Group's policy as described in note *3 p) Impairment of non-financial assets*.

Lessor: Lessor accounting is substantially unchanged as a result of the implementation of IFRS 16 "Leases". The Group also acts as lessor in contract through which substantially all the risks and rewards of ownership are transferred to the lessee. These contracts are classified as finance leases and a receivable equal to the present value of minimum lease payments is recognized in the consolidated financial statements. Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income is accounted for on a straight-line basis over the lease term and is included in revenue in the statement of profit or loss under "Other operating income".

p) Impairment of non-financial assets

The carrying amounts of the Group's non-financial assets, other than deferred tax assets, are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists then the asset's recoverable amount is estimated.

An impairment loss is recognized if the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount.

A cash-generating unit is the smallest identifiable group of assets that generates cash flows that largely are independent from other assets or groups of assets. Impairment losses are recognized in profit or loss.

Impairment losses recognized in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the cash-generating unit and then to reduce the carrying amount of the other assets of the cash-generating unit, on a pro rata basis.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

Impairment losses recognized in prior periods are assessed at each reporting date. An impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

q) Inventory

Inventories are measured at the lower of cost or net realizable value. Repossessed real estates resulting from loans are booked in accordance with IAS 2 "Inventories", at the lower of the cost (i.e.: loan net of provision) and net realizable value (i.e.: realization value of collateral, decreased by selling costs).

r) Deposits from customers, loans from banks, debt securities issued, subordinated liabilities and other equity instruments

Deposits from customers, loans from banks, debt securities issued, subordinated liabilities and other equity instruments are the Group's sources of funding.

The Group classifies issued financial instruments as financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instrument.

Deposits from customers, loans from banks, debt securities issued and subordinated liabilities are initially measured at fair value plus transaction costs, and subsequently measured at their amortized cost using the effective interest method.

Other equity instruments are comprised of subordinated unsecured instruments notes issued by the Group that are classified as equity instruments (refer to *Note 43*). At initial recognition the instruments are booked at nominal amount less transaction costs directly attributable to the instruments. The instruments are kept in functional currency, its value being the amount in foreign currency multiplied by the exchange rate applicable at transaction date. Subsequently they are maintained in functional currency, without being revaluated, as the instruments represent non-monetary elements. Distributions from principal are paid from distributable profits and represent dividends. In case the Group requires redemption, the payment is made in original currency, at the exchange rate available at the payment date. If a decision for redemption is made, the instruments are reclassified as financial liabilities. Also, in case distributions are made during the period in which the instruments are classified as liabilities, such distributions represent interest expense for the Group. In case of write down, the amount is booked directly in equity.

s) Employee benefits

Short-term benefits

Short-term employee benefit obligations are expensed as the related service is provided. Short-term employee benefits include wages, bonuses and social security contributions.

An accrual is recognized for the amounts expected to be paid under short-term cash bonus or profitsharing plans, if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Defined contribution plans

Obligations for contributions to defined contribution pension plans are recognized as an expense in the consolidated statement of comprehensive income as incurred.

The Group, in the normal course of business makes payments to the Romanian State funds on behalf of its Romanian employees for pension (Pillar 3), health care and unemployment benefit. All employees of the Group are members and are also legally obliged to make defined contributions (included in the social security contributions) to the Romanian State pension plan (a State defined contribution plan). All relevant contributions to the Romanian State pension plan are recognized as an expense in the consolidated statement of comprehensive income as incurred. The Group does not have any further obligations.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

Defined benefit plans

The Group does not operate any defined benefit plan and, consequently, has no obligation in this respect.

Long-term employee benefits

The Group's net obligation in respect of long-term service benefits, other than postemployment plans, is the amount of future benefit that employees have earned in return for their service in the current and prior periods.

In case of retirement, the Group offers to the respective employees a number of salaries, depending on the service period. The obligation for this jubilee granted under the provisions of the Group's collective labour agreement is estimated using the projected unit credit method and is recognized to the consolidated statement of comprehensive income on an accruals basis. Changes in the discount rate and from other actuarial assumptions are recognized in other comprehensive income.

t) Business combination

The acquisition of business operations is recognized according to the acquisition method. The consideration transferred in a business combination is measured at fair value. This is calculated as the aggregate of the acquisition date fair value of all assets transferred, liabilities assumed from former owners of the acquired business combination and equity instruments issued by the Group in exchange for control of the business combination.

Transaction costs related to business combinations are recognized in the income statement when incurred.

Goodwill is measured as the excess of the aggregate of the value of the consideration transferred, the amount of any non-controlling interest and the acquisition-date fair value of the acquirer's previously-held equity interest in the acquiree (if any), and the net of the acquisition-date amounts of the fair values of identifiable assets acquired and the liabilities assumed.

In the event that the difference is negative after further review, the resulting gain is recognized immediately in the income statement.

u) Provisions

A provision is recognized in consolidated financial position if, as a result of a past event, the Group has a present legal or constructive obligation that can be estimated reliably and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and, where appropriate, the risks specific to the liability. Provisions include provisions for pending legal issues, provisions for un-drawn commitments and other provisions.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

v) Taxes

Income tax policy is described in *Note 3 i*). The Group recognizes its liabilities related to the deposit insurance fee, resolution fund fee and banking tax in accordance to IFRIC Interpretation 21, "Levies".

The liability to pay these levies is recognized when they become constructive. For the deposit insurance fee and resolution fund fee, the obligation arises annually on January 1, as the Bank performs activities related to deposits received. For the banking tax, the obligation arises annually on December 31 when all the information regarding its calculation is available.

w) Segment reporting

The Group discloses information at segment level to enable users of its financial statements to evaluate the nature and financial effects of the business activities in which it engages and the economic environments in which it operates.

An operating segment is a component of the Group:

- (a) that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the Group)
- (b) whose operating results are regularly reviewed by the entity's chief operating decision maker to take decisions about resources to be allocated to the segment and assess its performance, and
- (c) for which discrete financial information is available. Segment reporting is based on the following business lines of the Group: corporate, individuals, small and medium entities (referred to as "SME") and treasury, the latter including financial institutions.
- 4. Standards, interpretations and amendments to published International Financial Reporting Standards

Standards issued but not yet effective and not early adopted:

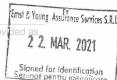

The Group has not adopted early any standard, interpretation or amendment that has been issued but is not yet effective.

 Amendment in IFRS 10 Consolidated Financial Statements and IAS 28 Investments in Associates and Joint Ventures: Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28, in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The main consequence of the amendments is that a full gain or loss is recognized when a transaction involves a business (whether it is housed in a subsidiary or not). A partial gain or loss is recognized when a transaction involves assets that do not constitute a business, even if these assets are housed in a subsidiary. In December 2015 the IASB postponed the effective date of this amendment indefinitely pending the outcome of its research project on the equity method of accounting. The amendments have not yet been endorsed by the EU.

 IAS 1 Presentation of Financial Statements: Classification of Liabilities as Current or Noncurrent (Amendments)

The amendments are effective for annual reporting periods beginning on or after January 1, 2022 with earlier application permitted. However, in response to the covid-19 pandemic, the Board has deferred the effective date by one year, i.e. 1 January 2023, to provide companies with more time to implement any classification changes resulting from the amendments.

4. Standards, interpretations and amendments to published International Financial Reporting Standards (continued)

The amendments aim to promote consistency in applying the requirements by helping companies determine whether, in the statement of financial position, debt and other liabilities with an uncertain settlement date should be classified as current or non-current. The amendments affect the presentation of liabilities in the statement of financial position and do not change existing requirements around measurement or timing of recognition of any asset, liability, income or expenses, nor the information that entities disclose about those items. Also, the amendments clarify the classification requirements for debt which may be settled by the company issuing own equity instruments. These Amendments have not yet been endorsed by the EU.

IFRS 3 Business Combinations; IAS 16 Property, Plant and Equipment; IAS 37 Provisions, Contingent Liabilities and Contingent Assets as well as Annual Improvements 2018-2020 (Amendments)

The amendments are effective for annual periods beginning on or after 1 January 2022 with earlier application permitted. The IASB has issued narrow-scope amendments to the IFRS Standards as follows:

- > IFRS 3 Business Combinations (Amendments) update a reference in IFRS 3 to the Conceptual Framework for Financial Reporting without changing the accounting requirements for business combinations.
- ➤ IAS 16 Property, Plant and Equipment (Amendments) prohibit a company from deducting from the cost of property, plant and equipment amounts received from selling items produced while the company is preparing the asset for its intended use. Instead, a company will recognise such sales proceeds and related cost in profit or loss.
- > IAS 37 Provisions, Contingent Liabilities and Contingent Assets (Amendments) specify which costs a company includes in determining the cost of fulfilling a contract for the purpose of assessing whether a contract is onerous.
- Annual Improvements 2018-2020 make minor amendments to IFRS 1 First-time Adoption of International Financial Reporting Standards, IFRS 9 Financial Instruments, IAS 41 Agriculture and the Illustrative Examples accompanying IFRS 16 Leases

The amendments have not yet been endorsed by the EU.

IFRS 16 Leases-Covid 19 Related Rent Concessions (Amendment)

The amendment applies, retrospectively, to annual reporting periods beginning on or after 1 June 2020. Earlier application is permitted, including in financial statements not yet authorized for issue at 28 May 2020. IASB amended the standard to provide relief to lessees from applying IFRS 16 guidance on lease modification accounting for rent concessions arising as a direct consequence of the covid-19 pandemic. The amendment provides a practical expedient for the lessee to account for any change in lease payments resulting from the covid-19 related rent concession the same way it would account for the change under IFRS 16, if the change was not a lease modification, only if all of the following conditions are met:

- ➤ The change in lease payments results in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change.
- > Any reduction in lease payments affects only payments originally due on or before 30 June 2021.
- There is no substantive change to other terms and conditions of the lease.

The Group did not apply the relief allowed by this amendment.

- 4. Standards, interpretations and amendments to published International Financial Reporting Standards (continued)
- Interest Rate Benchmark Reform Phase 2 IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16 (Amendments)

In August 2020, the IASB published Interest Rate Benchmark Reform – Phase 2, Amendments to IFRS 9, IAS 39, IFRS 7, IFRS 4 and IFRS 16, completing its work in response to IBOR reform. The amendments provide temporary reliefs which address the financial reporting effects when an interbank offered rate (IBOR) is replaced with an alternative nearly risk-free interest rate (RFR). In particular, the amendments provide for a practical expedient when accounting for changes in the basis for determining the contractual cash flows of financial assets and liabilities, to require the effective interest rate to be adjusted, equivalent to a movement in a market rate of interest. Also, the amendments introduce reliefs from discontinuing hedge relationships including a temporary relief from having to meet the separately identifiable requirement when an RFR instrument is designated as a hedge of a risk component. Furthermore, the amendments to IFRS 4 are designed to allow insurers who are still applying IAS 39 to obtain the same reliefs as those provided by the amendments made to IFRS 9. There are also amendments to IFRS 7 Financial Instruments: Disclosures to enable users of financial statements to understand the effect of interest rate benchmark reform on an entity's financial instruments and risk management strategy. The amendments are effective for annual periods beginning on or after 1 January 2021 with earlier application permitted. While application is retrospective, an entity is not required to restate prior periods. Management is currently in process of assessing the impact from these amendments.

The exposure of the Bank towards relevant benchmark rates at 31 December 2020 are presented below:

RON thousand	Loans and advances	Deposits	Debt securities (assets)	Debt securities issued (liabilities)	Derivatives
	Carrying amount	Carrying amount	Carrying amount	Carrying amount	Notional
referenced to EONIA	507,465	976	-	-	-
of which: maturing after 2021	19,684	976	-	-	-
referenced €STR	-	-	-	-	-
referenced to EURIBOR (all tenors)	6,443,752	681,562	-	-	339,543
referenced to LIBOR (all tenors)	865,581	5,752	40,613	-	-
of which: USD	409,213	5,752	40,613	-	-
of which: CHF	456,368	-	-	-	-
referenced to other (national) benchmarks (all tenors)	14,289,438	73,435	224,539	480,000	86,000
of which ROBOR	12,031,946	73,435	224,539	480,000	86,000
of which IRCC	2,257,491	-	-	-	-

The risk related to the implementation of the new family of risk free interest rates introduced to markets are:

- Risks on the existing contracts (legacy contracts), for which new interest rates will be used and their calculation:
- A high risk in relation to the loans granted to personal individuals, in swiss franc currency, for which it is required to change in the national legislation, with the implication of all relevant authorities (Romanian Central Bank, Financial Supervisory Authority, the National Authority for Consumer Protection and the Government) because the existing legislation only allow for the interest rates mentioned by current regulations:
- The effort to adapt the IT systems in order to allow the replacement of the existing benchmarks with the new ones and the need for the calculation of rates by the Bank.

In order to make the transition to the new benchmarks, the Bank performed the following activities:

- changed the new contracts with the customers so that the fallback clause was included since January 2020;
- participates in the working group related to benchmark reform impact in romanian banking system, in order to introduce new clauses related to benchmark reform in the Romanian legislation.

In the following period the Bank will:

- enable technical implementation of the new rates in the banks' systems;
- change the current rates on existing contracts with the new fallback rates starting with January 1st, 2022.

5. FINANCIAL RISK MANAGEMENT

a) Introduction and overview

The Group has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk
- Operational risk

This note provides details of the Group's exposure to each of the above mentioned risks, as well as Group's policies and processes for measuring and managing risk.

The most important types of financial risks to which the Group is exposed are credit risk, liquidity risk, market risk and operational risk. Market risk includes currency risk, interest rate risk and equity price risk.

Risk management framework

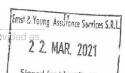

The Management Board has overall responsibility for the establishment and oversight of the risk management framework. Assets and Liabilities Committee ("ALCO"), Credit Risk Committee, Risk Management Committee and Problem Loan Committee are responsible for developing and monitoring Group's risk management policies in their specified areas.

All committees report regularly to the Management Board. The framework for risk management is defined in the risk strategy, elaborated and reviewed with annual frequency. The risk profile is also annually reviewed and comprises the evaluation of all risks considered significant. The Group's risk management policies are established to identify and analyze the risks faced by the Group, to set appropriate risk limits and controls and to monitor risks and compliance with the approved limits.

Risk management policies and systems are reviewed regularly to reflect changes in market conditions, products and services offered. The Group, through its training and management standards and procedures, aims to develop a disciplined and constructive control environment, in which all employees understand their roles and obligations. This process of risk management is critical to the Bank's continuing profitability and each employee within the Group is responsible for monitoring compliance with the Group's risk management procedures.

The Audit Committee reports to the Supervisory Board and has the responsibility to monitor the compliance with risk management procedures. Internal Audit assists the Audit Committee in these functions. Internal Audit undertakes both regular and ad-hoc reviews of risk management controls and procedures, the results of which are reported to the Audit Committee.

The Stress Testing exercises are a common practice in the Group. Stress tests to be performed are either locally developed or developed and run at Raiffeisen Bank International Group level. The bank put in place a "Business stress testing concept paper" which establishes the steps, concepts, methodologies and timelines in stress testing process. All stress tests results are analyzed and reported to management.

b) Credit risk

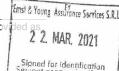

i) Credit risk management

Credit risk is the risk that the Group will incur a loss because its customers or counterparties fail to discharge their contractual obligations. The Group manages and controls credit risk by setting limits on the amount of risk it is willing to accept for individual counterparties and for geographical and industry concentration, and by monitoring exposures in relation to such limits. The Group is exposed to credit risk through its lending, trading and investing activities and in cases where it acts as an intermediary on behalf of customers or other third parties, or in the situation in which it conducts financial leasing operations, or it issues guarantees.

Credit risk associated with trading and investing activities is managed through the Group's credit risk management process. The risk is mitigated through selecting counterparties of good financial standings and monitoring their activities and through the use of credit limits and when appropriate, by obtaining collateral. The Group's primary exposure to credit risk arises through its loans and advances to customers as well as from conduction of activities related to concluding finance lease contracts. The amount of credit exposure in this regard is represented by the carrying amounts of the assets on the balance sheet. The Group is exposed to credit risk on various other financial assets, including derivative instruments and debt investments, the current credit exposure in respect of these instruments is equal to the carrying amount of these assets in the balance sheet. In addition, the Group is exposed to off balance sheet credit risk through commitments to extend credit and guarantees. In order to minimize this risk, Group procedures are in place to screen the customers before granting the loans and lease contracts and to monitor their ability to repay the principal and interest during the duration of the loans and lease contracts and to establish exposure limits.

The Management Board has delegated the responsibility for the credit risk management to the Credit Committee. A Risk Division, reporting to the Chief Risk Officer is responsible for oversight of the Group's credit risk, including:

- Formulating credit policies, by pursuing the target of maintaining a healthy loan portfolio, by establishing adequate limits and defining specific lending criteria for certain products, clients categories etc.
- Establishing and implementing of procedures related to: the treatment and valuation of collaterals, periodical loan reviews, classification and loan portfolio reporting, legal documentation related to loans and lending activity, monitoring and treatment of nonperforming loans, ensuring compliance with the regulatory requirements.
- Establishing an authorization structure of approval and renewing of loan facilities: the authorization limits can be settled at the individual level of certain designated risk analysts or at the Credit Committee level or at the level of the approving entity designated at Group level. The authorization limits are stipulated in the Credit Committee and are established on different criteria like loan amount and compliance with the credit policies.
- Evaluation and review of the credit risk take place in accordance with the authorization limits set out in the Credit Committee as well as with the regulatory requirements.
- Limiting concentrations of exposure to counterparties, geographical areas, industries and by issuer, loan classification category, market liquidity and country (for investment securities). The concentration risk is monitored throughout the portfolio management activity. It is analyzed on a monthly basis through reports and presented to the personnel involved in the lending activity as well as to the management.
- Developing and maintaining the client classification systems depending on the risk grading.
 Unitary client classification systems are used at Group level depending on the client risk grading.
 These systems comprise both scoring and rating methodologies. The Group performs periodical reviews of the clients' classification systems. The risk grading measured through the above mentioned systems stands at the base of determining the loan loss provision necessary to cover the default risk.

- Reviewing and monitoring the compliance of business units with the limits established through the Credit Policies and internal norms.
- Regular reports are provided to Credit Committee on loan portfolio quality and appropriate corrective actions are proposed and implemented.
- Providing information, advice, guidance and expertise to business units in order to promote credit risk management best practice throughout the Group.

The Group has implemented an Early Warning Signs, which is used for a monthly credit portfolio screening targeting identification of upcoming problematic exposures as early as possible. The system is based on triggers automatically detected for each client on monthly basis, but it is also based on ad-hoc manual input if adverse information is known.

The implementation of the credit policies and procedures is insured at the Group's level. Each branch is obliged to respect and implement the Group's loan policies and procedures. Each branch is responsible for the quality and performance of its credit portfolio. The Group has process of centralization of both credit approval and loan administration for companies and individuals, which leads to improved quality of the credit portfolio and better monitoring.

Internal Audit undertakes regular audits of branches/agencies and Group credit processes.

The major concentrations of credit risk arise by type of customer in relation to the Group's loans and advances and credit commitments. Concentrations of credit risk that arise from financial instruments exist for groups of counterparties when they have similar economic characteristics that would cause their ability to meet contractual obligations to be similarly affected by changes in economic or other conditions. The major concentrations of credit risk arise by individual counterparty and by type of customer in relation to the Group's loans and advances, commitments to extend credit and guarantees issued.

ii) Credit risk management

In the table below are presented the risk concentrations by product for retail customers and by economic sectors for non-retail customers. In the table are presented gross balance sheet exposures:

Default	-	-	853,952	=	77,800	853,952
Not Rated	552,278	35,576	3,807	16	-	591,661
Total	13,835,868	2,086,876	857,759	147,901	77,800	16,780,503

Stage 2 and Stage 3 columns include also POCI loans. The POCI loans are included in stage 3 if they are still impaired at the end of the reporting period. Otherwise if they have been cured, they are included in "Stage 2", but remain to be accounted for as POCI as required by IFRS 9.

In "Not Rated" category are also included retail exposures of subsidiaries for which the standard approach method is applied in the calculation of risk weighted assets. For the standard approach portfolios, no models are available and so the internal rating is not applicable. For these exposures, general IFRS 9 impairment rules apply, as described *in Note 3 (ix) Identification and measurement of impairment.*

Stage 2 and Stage 3 columns include also POCI loans. The POCI loans are included in stage 3 if they are still impaired at the end of the reporting period. Otherwise if they have been cured, they are included in "Stage 2", but remain to be accounted for as POCI as required by IFRS 9.

In "Not Rated" category are also included retail exposures of subsidiaries for which the standard approach method is applied in the calculation of risk weighted assets. For the standard approach portfolios, no models are available and so the internal rating is not applicable. For these exposures, general IFRS 9 impairment rules apply, as described in *Note* 3 (ix) Identification and measurement of impairment.

The tables below present the split of loans and advances to non - retail customers by credit quality. The internal rating grade presented is further explained below within *Note 5*, within the Group's internal credit rating grades tables.

Emst & Young Assurance Services S.R.L s is provided as 2 2. MAR. 2021

5. FINANCIAL RISK MANAGEMENT (continued)

At Group level, loans and advances to banks in amount of RON 972,059 thousand (31 December 2019: RON 207,307 thousand), as well as investment securities at fair value through other comprehensive income in amount of RON 3,212,528 thousand (31 December 2019: RON 2,398,161 thousand) and investment securities at amortised cost in amount RON 6,095,709 thousand (31 December 2019: RON 4,952,776 thousand), are all classified in Stage 1.

At Bank level, loans and advances to banks in amount of RON 971,166 thousand (31 December 2019: RON 201,002 thousand), as well as investment securities at fair value through other comprehensive income in amount of RON 3,150,884 thousand (31 December 2019: RON 2,326,371 thousand), and investment securities at amortised cost in amount RON 5,912,605 thousand (31 December 2019: RON 4,674,232 thousand), are all classified in Stage 1.

Loans and advances to banks as of 31 December, 2020 mainly represent term deposits and collateral deposits in correspondent bank accounts and collateral deposits. Nostro accounts are always available to the Group, are not restricted, not overdue or impaired. Bank counterparties are financial institutions presenting strong financial strength.

For corporate entities, small and medium entities, financial institutions, local and central public authorities customers, the Group uses rating scales associated with the financial performance, both for the individually and for the collectively impaired loans and advances. In accordance with the Group's policies and procedures, a rating can be associated for each category of risk, from the lowest risk considered (Rating 1) to defaulted loans category (Rating 10). In the case of private individuals and micro exposures, the credit risk is assessed based on advanced internal model rating approach. The Bank assigns ratings to customers at facility level for private individuals and at customer level for micro. After the calibration process a probability of default is assigned to rating classes associated.

5. FINANCIAL RISK MANAGEMENT (continued)

The tables on the following pages show the maximum on-balance sheet exposure to credit risk by segment. They also show the total fair value of collateral, any surplus of collateral and the net exposure to credit risk.

2 2. MAR. 2021 Signed for identification emnat pentru identificat

Impaired loans and securities

Impaired loans and securities are loans and securities for which the Group determines that it is probable that it will be unable to collect all principal and interest due according to the contractual terms of the loan / securities agreement(s).

Past due status

For loans and securities, where contractual interest or principal payments are past due the Group believes that impairment is not appropriate due to the fact that there are no objective evidence for impairment or there are objective evidence of impairment but there is no identified loss at the level of these customers.

Loans and advances to customers past due of December 31, 2020 were as follows:

Group	Stage 1				Stage 2		Stage 3

RAIFFEISEN BANK SA Notes to the consolidated and separate financial statements for the year ended 31 December 2020

The Group's internal credit rating grades

The tables below show the internal credit rating grade by type of customers:

Retail: Private Individuals, MICRO					
Internal rating grade	Internal rating description	12 month Basel III PD range			
Performing					
0	Not Rated				
0.5	Minimal Risk	[0.00%-0.17%]			
1	Excellent Credit Standing	[0.17% - 0.35%)			
1.5	Very Good Credit Standing	[0.35% - 0.69%)			
2	Good Credit Standing	[0.69% - 1.37%)			
2.5	Sound Credit Standing	[1.37% - 2.7%)			
3	Acceptable Credit Standing	[2.7% - 5.26%)			
3.5	Marginal Credit Standing	[5.26% - 10%)			
4	Weak Credit Standing	[10% - 18.18%)			
4.5	Very Weak Credit Standing	[18.18% - 100%)			
Non- performing					
5	Default	100%			

In "Not Rated" category are also included retail exposures of subsidiaries for which the standard approach method is applied in the calculation of risk weighted assets. For the standard approach portfolios, no models are available and so the internal rating is not applicable. For these exposures, general IFRS 9 impairment rules apply, as described in *Note* 3 (ix) Identification and measurement of impairment.

Non-retail: Corporate, Small and medium business and Financial institution					
Internal rating grade	Internal rating description	12 month Basel III PD range	Internal rating grade mapping

RAIFFEISEN BANK SA Notes to the consolidated and separate financial statements for the year ended 31 December 2020

5. FINANCIAL RISK MANAGEMENT (continued) Non-performing not defaulted exposure (NPE not defaulted) Regulation for forborne and non-performing exposures

The regulation for forbearance pursuant to EBA/ITS/2013/03/rev1 from 24th of July 2014 and updated in 10th of March 2015 was implemented at Group level.

For reporting purposes, according to EBA ITS, non-performing exposures are considered those that satisfy at least one of the following conditions:

- a) The exposure was classified as default/Stage 3 according to IFRS 9;
- b) Performing restructured exposure that was reclassified from non-performing exposure and for which the restructuring measures have been extended during the monitoring time frame;
- c) Performing restructured exposure that was reclassified from non-performing exposure and for which number of days past due reached more than 30 days during the monitoring time frame.

Forbearance refers to concessions made to the borrower by the lender, for economic or contractual reasons, when the borrower is experiencing financing difficulties, but which the lender would not otherwise grant.

Non-retail

For non-retail clients, when terms or loan conditions are modified in favour of the customer, the Group differentiates between normal renegotiation and forborne loans according to the definition of the EBA document "Implementing Technical Standard (ITS) on Supervisory Reporting (Forbearance and non-performing exposures)". According to EBA definition, non-performing exposure includes exposure without any reason for default according to Article 178 CRR, but has been reclassified from non-performing status and subsequently, during the probationary period as performing restructured, restructuring measures have been extended or 30 days of overdue payment were recorded.

Loans are defined as forborne if the debtor is assessed to have financial difficulties and the modification is assessed as concession. For non-retail customers, financial difficulties are measured by means of an internal early warning system and assessed by financial and risk analysts. Such loans are rated 7 or below 7 in the internal rating scale, which means that such loans have marginal credit standing or worse.

IFRS 9 requires that impairment losses for Stage 1, 2 and 3 must be derived from an expected loss event. Pursuant to article 178 CRR default continues to be main indicator for Stage 3.

Retail

For retail customers, the restructured loans are subject to probation period for one year in terms of non-performing status extended to the period until the exit criteria is met.

In the case of a non-performing exposure to Micro SME, the non-performing status is applied at debtor level.

In the case of a non-performing exposure to a PI, all other debtor's exposures of the same product group shall be considered non-performing (i.e. at product level).

Due to pulling effect, when a PI debtor has on-balance sheet exposures past due more than 90 days, the gross carrying amount of which represents 20% of the gross carrying amount of all its on-balance sheet exposures, all on and off-balance sheet exposures of this debtor shall be considered as non-performing and so the non default facilities might be reclassified as non performing due to contamination at product and debtor level.

c) Liquidity risk

Liquidity risk is generated in the normal course of banking activity being a consequence of the bank's response to client needs. While depositors need short term access to their funds, borrowers need the possibility to repay the loans in medium to long term timeframes, therefore by responding to these needs the Bank accepts a degree of liquidity risk that has to be actively managed.

TRANSLATOR'S EXPLANATORY NOTE: The above translation of the consolidated and separate financial statements is pro-

RAIFFEISEN BANK SA Notes to the consolidated and separate financial statements for the year ended 31 December 2020

5. FINANCIAL RISK MANAGEMENT (continued)

The Management Board defines the liquidity risk strategy based on recommendations made by the units responsible for liquidity and funding management in cooperation with the area responsible for monitoring and controlling of liquidity risk. Management Board approves each year the limits which are applied to measure and control liquidity risk as well as the Bank's funding plan.

The risk tolerance of the Bank represents the foundation of the liquidity risk management framework and is defined:

- for normal business conditions, using a set of limits for the long term liquidity risk profile. The role of the limits is to prevent the accumulation of liquidity risk from current activity of the Bank;
- for stress conditions, tolerance is the Bank's capacity to operate for an acceptable time without significant changes to the strategy or business model.

Treasury and Capital Markets Division function is responsible for the management of liquidity and funding risk of the Bank and Risk Management Division has responsibilities for liquidity risk monitoring and controlling, as defined in the liquidity and funding strategies.

For liquidity management, the Bank analyses, monitors and forecasts the liquidity behaviour of products and business segments and maintain long-term liquidity, including stable deposits, in excess of illiquid assets, at an optimal cost, as defined in the risk appetite.

Diversification of funding profile in terms of investor types, products and instruments is an important element of the liquidity management framework. The core funding resources come from retail clients while other customer's deposits, interbank deposits and borrowings are additional sources of funding. This improves the Bank's flexibility in funding and diminishes the liquidity cost.

The transfer pricing mechanism represents an important instrument for the management of liquidity risks. It covers the balance sheet and off balance sheet elements and is designed to allocate all costs and benefits to the business segments in a way that incentivizes the efficient use of liquidity.

The main tools used for liquidity and funding risk management are:

- the liquidity gap report: used to identify and measure the maturity mismatch between assets and liabilities;
- liquidity scorecard: tool for assessing the robustness of the balance sheet structure (loans to deposits ratio, funding concentration, size of liquid assets in relation to total obligations, etc);
- regulatory liquidity gap: the Bank has to comply with a regulatory liquidity indicator which sets minimum liquidity risk standards at banking system level;
- funding scorecard: the Bank ensures that funding risk is mitigated through the monitoring of several triggers, among which: the concentration in sources of wholesale funding, maturity concentration, the dependence on short term funding and the percentage of unencumbered assets.

At Bank level, there are pre-established trigger levels set for the main tools which are monitored and, in case a breach is observed or anticipated, a specific action plan is taken based on senior management decision.

For stress conditions, the Bank maintains a sufficient liquidity buffer that can be used to compensate the limited access to funding sources and liquidity outflows during stress periods. The Bank determines the necessary liquidity buffer based on stress test analysis. In addition the Bank defines a contingency plan which establishes responsibilities and specific actions that can be taken to strengthen liquidity position on short term and reduce liquidity risk on medium to long term.

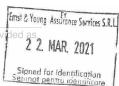

The main tools used for stress conditions are:

- Early warning system: used to monitoring financial markets and internal liquidity indicators in order to anticipate accumulation of risks and potential stress conditions;
- Internal stress test: scenario based analysis used to evaluate Bank's ability to operate in stress conditions:
- Regulatory liquidity coverage ratio: scenario based analysis standardized at banking system level, used to evaluate Bank's ability to operate in stress conditions, as described in CRR/ CRD IV package.
 According to the standard, banks are required to hold an adequate stock of unencumbered high quality assets (HQLA) to cover potential liquidity outflows in stress conditions.

Usually, the most significant liquidity gap is registered in the first interval (up to 3 months) mainly due to non-banking customers, which prefer short term maturities for deposits and long term maturities for loans. This behaviour that determines a negative gap in the first interval generates a positive gap on the other intervals (higher than 3 months). In practice the negative gap in the first bucket does not represent outflows as most customer deposits are rolled over or replaced by new deposits.

Also the Group securities portfolio can be turned to cash (repo or sale) in a short time representing thus a buffer that diminishes the liquidity risk in the first bucket.

Group:

The negative liquidity gap on the first bucket has increased in 2020 by RON 2,323,324 thousand compared to 2019, being generated by the increase in customer deposits, higher in 2020 by RON 7,384,450 thousand which was only partially compensated by the increase in cash and cash with Central Bank by RON 4,347,319 thousand.

With regards to the other buckets, the most significant one is related to bucket 1-5 years. Here the increase in maturity surplus by RON 2,461,666 thousand is mainly due to increase in loans and advances to customers by RON 1,047,566 thousand and to higher investment securities at amortised cost by RON 866,379 thousand.

Bank:

The negative liquidity gap on the first bucket has increased in 2020 by RON 2,320,733 thousand compared to 2019, being generated by the increase in customer deposits, higher in 2020 by RON 7,452,465 thousand, which was only partially compensated by the increase in cash and cash with Central Bank by RON 4,347,723 thousand.

With regards to the other buckets, the most significant one is related to bucket 1-5 years. Here the increase in maturity surplus by RON 2,406,972 thousand is mainly due to increase in loans and advances to customers by RON 1,070,512 thousand, but also due to higher investment securities at amortised cost by RON 768,055 thousand.

Analysis of financial liabilities by remaining contractual maturities

The amounts disclosed in the below tables represent contractual maturity analysis for financial liabilities disclosed in accordance with IFRS 7, whereby the undiscounted cash flows to be shown in these predefined maturity-bands differ from the amounts included in the balance sheet because the balance sheet amount is based on discounted cash flows.

Group

Financial liabilities analyzed over the remaining period from the reporting date, using undiscounted cash flows as of 31 December 2020 are as follows:

Up to 3 Months	3 Months to 1 Year	1 Year to 5 Years	Over 5 Years	Total
2,831,783	469,129	1,919	-	3,302,831

d) Market risk

Market risk is the risk that changes in market prices, such as interest rates, foreign exchange rates and others will affect the Group's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return on risk.

The Group separates its exposure to market risk between trading and non-trading portfolios.

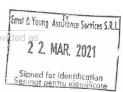

The principal tool used to measure and control market risk exposure within the Group's trading portfolios is Value at Risk (VaR).

The VaR of a trading portfolio is the maximum estimated loss that can arise on the portfolio over a specified period of time (holding period) from an adverse market movement with a specified probability (confidence level). In 2020, the VaR model used by the Group is based upon a 99% confidence level and assumes a 1 day holding period.

Although VaR is an important tool for measuring market risk, the assumptions on which the model is based do give rise to some limitations, including the following:

- A 1 day holding period assumes that it is possible to hedge or dispose of positions within that period. This is considered to be a realistic assumption in almost all cases but may not be the case in situations when there is severe market illiquidity for a prolonged period;
- A 99% confidence level does not reflect losses that may occur beyond this level. Even within the
 used model there is a 1% probability that losses could exceed the VaR;
- VaR is calculated on an end-of-day basis and does not reflect exposures that may arise on positions during the trading day.

The Group uses VaR limits for total market risk and for individual foreign exchange and interest rate risk. The overall structure of VaR limits is subject to review and approval by the Assets and Liabilities Committee (ALCO). VaR is calculated on a daily basis. Reports including VaR limits utilization are submitted daily to Group management and monthly summaries are submitted to ALCO.

A summary of the VaR position of the Group's trading portfolios at December 31, 2020 and 2019 and during the period is as follows (trading portfolio includes trading assets and trading liabilities as well as the overall FX position of the Group):

	At 31		Maximum	
In RON thousand	December	Average Risk	Risk	Minimum Risk
2020		-		
Foreign currency risk*	631	414	953	103
Interest-rate risk	278	355	1,001	66
Total	909	769	1,954	169
2019				
Foreign currency risk*	313	306	917	22
Interest-rate risk	300	379	1,698	102
Total	613	685	2,615	124
				<u> </u>

^{*} Foreign currency risk is calculated based on the overall foreign exchange position of the Group

A summary of the VaR position of the Bank's trading portfolios at December 31, 2020 and 2019 and during the period is as follows (trading portfolio includes trading assets and trading liabilities as well as the overall FX position of the Bank):

	At 31		Maximum	
In RON thousand	December	Average Risk	Risk	Minimum Risk
2020		<u></u>		
Foreign currency risk*	630	414	953	103
Interest-rate risk	278	355	1,001	66
Total	908	769	1,954	169
2019				
Foreign currency risk*	283	306	917	22
Interest-rate risk	300	379	1,698	102
Total	583	685	2,615	124

^{*} Foreign currency risk is calculated based on the overall foreign exchange position of the Bank

At Bank level, the foreign exchange risk is managed through the overall open foreign currency position which represents the basis for the calculation of the VaR for currency risk. In addition to VaR, the foreign exchange risk is measured, monitored and controlled at Bank level through the set of limits for the open notional foreign currency position for each currency and for total. The Bank may have positions only in currencies for which an approved open foreign currency notional position limit is in place.

Exposure to interest rate risk for non-trading portfolios

The main risk to which non-trading portfolios are exposed is the interest rate risk. Interest rate risk represents the risk of loss due to adverse and unexpected movements in interest rates. On one side interest rate movements influence bank's earnings by affecting the net interest rate revenues (earnings perspective). On the other side movements in interest rates also affect the economic value of bank's assets, liabilities and off balance sheet items as the present value of future cash flows (and even the actual cash flows) may change following interest rate movements (economic value perspective). Interest rate risk is principally managed by monitoring the interest rate gap and a set of pre-approved limits. ALCO is the monitoring body for compliance with these limits and is assisted by Risk Management in its day-to-day monitoring activities.

The derivative financial instruments used by the Group to reduce the interest rate risk include swaps that fluctuate in value depending on the interest rates variations.

The swaps are over the counter market commitments and are traded between the Group and third parties with the purpose of exchanging future cash flows on agreed amounts. Through interest rate swaps, the Group agrees to exchange with third parties, at determined time intervals the difference between the fixed and variable interest rates.

The following tables provide an analysis of the interest rate risk exposure on non-trading financial assets and liabilities. The assets and liabilities are included at carrying amount and categorised by the earlier of contractual repricing or maturity dates, except for positions without contractual maturity (such as sight deposits from customers) which are distributed per buckets according to modeled interest rate profile calculated based on statistical methods.

TRANSLATOR'S EXPLANATORY NOTE: The above translation of the consolidated and separate financial statements is prova free translation from Romanian which is the official and binding version.

The management of interest rate risk through the set of interest rate gap limits is supplemented by monitoring the sensitivity of the Group's financial assets and liabilities to various standard and non-standard interest rate scenarios. From the economic value perspective the standard scenarios include a 200 basis point (bp) parallel shift in the yield curve for all currencies and all maturities.

The sensitivity scenarios calculate the change in the economic value of the banking book interest rate sensitive assets and liabilities of the Bank under the assumption that interest rates change according to the each of the scenarios mentioned above. Under each scenario the sensitivity result is calculated by comparing the present value of the banking book under stress scenario with the present value calculated using the base interest rate curve. The present value of the banking book asset and liabilities is calculated by discounting future cash flows generated by interest rate sensitive assets and liabilities which are distributed on repricing gaps according to next reset date – in case of floating rate instruments – or according to maturity date – in case of fixed rate instruments.

An analysis of the Group's sensitivity of the economic value of banking book assets and liabilities to an increase or decrease in market interest rates (assuming no asymmetrical movement in yield curves and a constant balance sheet position) is as follows:

In RON thousand	200 bp	200 bp
	Increase	Decrease
At 31 December 2020	255,790	287,759
Average for the period	341,432	384,381
Minimum for the period	255,790	287,759
Maximum for the period	420,502	473,313
At 31 December 2019	287,009	326,556
Average for the period	228,000	256,866
Minimum for the period	175,264	196,283
Maximum for the period	287,009	326,556

An analysis of the Bank's sensitivity to an increase or decrease in market interest rates (assuming no asymmetrical movement in yield curves and a constant balance sheet position) is as follows:

In RON thousand	200 bp	200 bp
	Increase	Decrease
At 31 December 2020	247,796	278,972
Average for the period	333,416	375,555
Minimum for the period	247,796	278,972
Maximum for the period	410,192	462,060
At 31 December 2019	280,110	318,919
Average for the period	224,494	252,991
Minimum for the period	175,009	196,148
Maximum for the period	280,110	318,919

According to EBA requirements (EBA/GL/2015/08), measurement and monitoring of interest rate risk in the banking book is done based on two approaches: economic value and net interest income (NII) volatility.

In order to assess the impact of interest rate changes on net interest income, a set of scenarios and assumptions are defined and used to measure net interest income volatility and potential losses. The assessment is made using a constant balance sheet, i.e. each maturing item is replaced by an item with similar characteristics, over a 12-month period and an instantaneous shock.

The impact of interest rate shocks on net interest income is presented below:

In RON million

Bank

Applied shock on Net Interest Income*	2020	2019	
Parallel +200bp	270	211	
Parallel -200bp	(417)	(344)	
Steepening 5Y +200bp	12	12	
Flattening 5Y -200bp	(40)	(38)	
Flattening 1D +200bp	259	199	
Steepening 1D -200bp	(376)	(303)	
Maximum positive impact	296	279	
Maximum negative impact	(433)	(418)	

^{*}The change in projected Net Interest Income over a forward-looking rolling 12-month period, using a constant balance sheet assumption and an instantaneous shock.

The interest rates related to the local currency and the major foreign currencies as at 31 December 2020 and 2019 were as follows:

Currencies Interest rate		31 December 2020	31 December 2019
RON	ROBOR 3 months	2.03%	3.18%
EUR	EURIBOR 3 months	-0.55%	-0.38%
EUR	EURIBOR 6 months	-0.53%	-0.32%
USD	LIBOR 6 months	0.26%	1.91%

Exposure to currency risk

The Group is exposed to currency risk due to transactions in foreign currencies. There is also a balance sheet risk that the net monetary assets in foreign currencies will take a lower value when translated into RON as a result of currency movements or net monetary liabilities in foreign currencies will take a higher value as a result of these currency movements.

^{*} Other currencies include mainly loans and advances to customers in CHF.

Derivative financial instruments used by the Group to mitigate currency risk include foreign exchange swaps.

e) Operational risk

Operational risk is the risk of direct or indirect loss arising from a wide variety of causes associated with the Group's processes, personnel, technology and infrastructure and from external factors other than credit, market and liquidity risk, such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour. Operational risks arise from all of the Group's operations and are faced by all business entities. This definition includes legal risk, but excludes strategic and reputational risk.

Legal risk is a component of the operational risk and is defined as the risk due to non-observance of the legal or statutory requirements and/or inaccurately drafted contracts and their execution due to lack of diligence in applying the respective law or a delay in reacting to changes in legal framework conditions.

The Group's objective is to manage operational risk so as to balance the avoidance of financial losses and damage to the Group's reputation with overall cost effectiveness and to avoid control procedures that restrict initiative and creativity.

The main responsibility for the development and implementation of controls to address operational risk is assigned to senior management within each business unit. This responsibility is supported by the development of overall Group standards for the management of operational risk in the following areas:

- Requirements for appropriate segregation of duties, including the independent authorization of transactions;
- Requirement for inclusion of operational risk responsibilities in each job position;
- Requirements for the reconciliation and monitoring of transactions;
- Compliance with regulatory and other legal requirements;
- · Documentation of controls and procedures;
- Requirements for the periodic assessment of operational risk faced by the Group, and the adequacy of controls and procedures to address the risks identified;
- Requirements for the reporting of operational losses and proposed remedial action;
- Development of contingency plans;
- Training and professional development;
- Ethical and business standards;
- Risk mitigation, including insurance where this is effective.

f) Capital management

The National Bank of Romania (NBR) regulates and monitors the capital requirements at individual level and at group level.

Regulation (EU) no 575/2013 of the European Parliament and of the Council requires that the Group maintain a minimum Common Equity Tier 1 capital ratio of 4.5%, a minimum Tier 1 capital ratio of 6% and a minimum total capital ratio of 8%. The capital adequacy ratio is calculated dividing total Group's own funds to the total risk weighted assets (Note 43).

Capital allocation

- a) Credit risk: Starting with July 1st, 2009, the method for the risk weighted assets applied by the Group is internal ratings based approach for Raiffeisen Bank non-retail exposures. Starting with December 1st, 2013, Raiffeisen Bank received National Bank of Romania approval for calculating capital requirements for credit risk related to retail portfolio using advanced internal ratings based approach (AIRB). For the subsidiaries portfolios the method used is the standard approach.
- b) Market risk: The Group calculates the capital requirements for market risk and for the trading book using the standard model.
- c) Operational Risk: Starting with 2010, the Group calculates the capital requirements for operational risk capital using the standard approach.

The Group complies with the regulatory requirements regarding capital adequacy as at 31 December 2020 and 2019, being above the minimum required values. For actual capital ratios, refer to *Note 43*.

6. USE OF ESTIMATES AND JUDGMENTS

The Group makes estimates and assumptions that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the given circumstances.

Impairment allowance on loans and advances

The application of the Group's accounting policy requires judgments from the management. The Group assesses on a forward-looking basis the expected credit losses associated with its financial instrument assets carried at amortised cost and FVOCI and with the exposures arising from loan commitments, financial guarantee contracts and leasing receivables. The calculation of expected credit losses requires the use of accounting estimates that do not always match actual results. The amount of impairment to be allocated depends on credit risk parameters such as: PD, LGD and EAD as well as on future-oriented information (economic forecasts) which are estimated by the management.

The impairment of assets accounted for at amortized cost is described in accounting policy 3j (ix).

To determine the impairment allowances sensitivity to changes in risk parameters (adjusted value of real estate collateral, probability of default) underlying provisioning computation, the Group has drawn up the following scenarios:

First scenario assumes changes in loss given default and price guarantees for retail real estate portfolio for the entire portfolio, taking into account a variation of +/-5%. In this scenario the provision for loan impairment loss would have been increased by RON 30,738 thousand (2019: increased by RON 36,004 thousand) or decreased by RON 31,001 thousand (2019: decreased by RON 36,004 thousand).

Second scenario assumes PD variation of +/-5%. In this scenario the provision for loan impairment loss would have been increased by RON 20,835 thousand (2019: increased by 17,483 thousand RON) or decreased by RON 20,809 thousand (2019: decreased by RON 17,360 thousand).

Third scenario assumes aggregation assumptions of the previous scenarios. In this scenario the provision for loan impairment loss would have been increased by RON 12,966 thousand (2019: increased by RON 13,291 thousand) or decreased by RON 8,650 thousand (2019: decreased by RON 14,383 thousand).

Parameters change by +/-5% is done in relation to the values used in provision calculation for December 2020 figures (December 2019).

Fair value of financial instruments

The fair value of financial instruments that are not traded on an active market (for example, unlisted treasury securities, bonds and certificates of deposit) is determined using valuation techniques. The Group uses its judgment to select the valuation method and make assumptions that are mainly based on market conditions existing at statement of financial position date. The Group has used discounted cash flow analysis for the equity instruments that were not traded in active markets.

Valuation of financial instruments

The Group measures fair values using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Quoted market price in an active market for an identical instrument;
- Level 2: Valuation techniques based on observable inputs. This category includes instruments
 valued using: quoted market prices in active markets for similar instruments; quoted prices for similar
 instruments in markets that are considered less active; or other valuation techniques where all
 significant inputs are directly or indirectly observable from market data;

RAIFFEISEN BANK SA Notes to the consolidated and separate financial statements for the year ended 31 December 2020

6. USE OF ESTIMATES AND JUDGMENTS (continued)

Level 3: Valuation techniques using significant unobservable inputs. This category includes all
instruments where the valuation technique includes inputs not based on observable data and the
unobservable inputs could have a significant effect on the instrument's valuation. This category
includes instruments that are valued based on quoted prices for similar instruments where significant
unobservable adjustments or assumptions are required to reflect differences between the instruments.

The Group measures fair values mainly using valuation techniques based on observable inputs, i.e. all significant inputs are directly or indirectly observable from market data. Valuation techniques include net present value and discounted cash flow models, as well as other valuation models. Assumptions and inputs used in valuation techniques include risk free and benchmark interest rates, bond yields, foreign currency exchange rates, expected price volatilities and correlations. The objective of valuation techniques is to arrive at a fair value determination that reflects the price of the financial instrument at the reporting date that would have been determined by market participants acting at arm's length.

The Group uses widely recognized valuation models for determining the fair value of common and simpler financial instruments, like interest rate and currency swaps, foreign exchange forwards and swaps, that use only observable market data and require little management judgment and estimation.

Observable prices and model inputs are usually available in the market for bonds and simple over the counter derivatives. Availability of these reduces the need for management judgment and estimations and also reduces the uncertainty associated with determination of fair values.

For bonds valuation the Group uses prices or yields which are observable in the market, quotes published by Central Bank or quotes received upon request from third parties.

For more complex instruments, like over the counter foreign exchange options or interest rate options, the Group uses valuation models, which are usually developed from recognized valuation models. These models also use inputs, which are observable in the markets.

The valuation techniques used to determine the fair value of customers' loans and deposits not measured at fair value and disclosed in the notes consider unobservable inputs and assumptions, such as the specific credit risk and contractual characteristics of the portfolios, but also observables inputs, the benchmark interest rates for recent originated portfolios.

The fair value of the unimpaired customer loans was determined based on the cash flows estimated to be generated by the portfolio. These amounts were discounted using the interest rates that would be currently offered to clients for similar products (the available offer as of the valuation date or loans granted during the last 3 months), by considering the characteristics of each loan, namely product type, currency, remaining tenor, interest rate type, customer segmentation and for non-retail clients also risk indicators based on the industry in which they are currently developing their activity. For the products no longer in the Group's offer, and for which no current market (observed interest rates) are available, following assumptions were used: similar products' prevailing margins for discounting, adjusted with the relevant market rate index correspondent to the particular products' currencies, the swap points required for the currency conversion (if applicable) and remaining tenors.

For the impaired loan portfolio, a similar discounted cash flow calculation resulted in a fair value calculation that can be approximated by the net book value.

The fair value of deposits from customers was determined based on the interest rate differential of the current portfolio as of the end of the reporting period and the prevailing interest rates offered by the Bank, during the last three months from the financial period ended. For the term deposits, a discounted cash flows calculation was performed using for discounting the weighted average margins pertaining to the new deposits opened during the last month of the reporting period, based on their specific characteristics like tenors, currencies and client types similar to the structure of the portfolio subject to the fair value calculation and current market yield.

RAIFFEISEN BANK SA Notes to the consolidated and separate financial statements for the year ended 31 December 2020

6. USE OF ESTIMATES AND JUDGMENTS (continued)

The fair value of the current accounts and savings accounts from clients was estimated to be equal to the book value, with no evidence of product characteristics requiring a different value than the one currently in accounting books.

For the borrowings, the Group performed a discounted cash flows analysis in order to estimate the fair value. The discount factor consisted of the initially calibrated spread, the liquidity curve at valuation date and the risk free rate at valuation date.

COVID-19

Following the outbreak of the COVID-19 pandemic, many businesses may face liquidity shortages and difficulties in timely payment of their commitments. This has an impact on the credit institutions, as delays in the repayment of the credit obligations may lead to an increase in the non-performing loans on credit institutions' balance sheets.

As a response to the negative impact that the COVID-19 pandemic may have on the banking sector, in Romania the government introduced a legislative moratoria, while also other forms of similar initiatives were offered by the banking sector (private moratoria).

The legislative moratoria, introduced by Government Emergency Ordinance no. 37/2020 offered the bank customers the following conditions:

- the delay in payment of bank installments up to 9 months, but no later than December 31, 2020;
- interest is capitalized for personal consumer loans, while the one related to mortgage is repaid during 60 monthly installments);
- customers could apply for the legislative moratoria until May 15 and later extended to June 15;
- this form of moratoria does not automatically lead to default, in accordance with the EBA Guidelines on legislative and non-legislative moratoria on loan repayments in relation to COVID-19.

At the end of 2020, the Government has extended the legislative moratoria, as required by the Government Emergency Ordinance no. 227/2020. The eligible debtors are those who meet the following criteria:

- Were not granted during 2020 any form of public and / or private moratoria which suspended their
 installments for a period of nine months. If such a moratoria was granted, the debtor is eligible for
 the remaining period until a total suspension period of 9 months applied to all forms of moratoria;
- Have their revenues / collections decreased by at least 25%;
- Are not insolvent;
- Do not have any overdue amounts at the date of request.

The deadline for applying to this programme is March 15, 2021.

In addition to the legislative measures, the Bank has implemented internal programmes for payment deferral, for supporting the customers facing liquidity shortages. As of December 31, 2020, the Bank has approved to 33,421 customers a form of payment deferral, out of which 33,071 customers are retail and 350 are non-retail.

The modification loss on the private moratoria is RON 11,577 thousand. No amounts were recognised in relation to the public moratoria, as its impact in the net present value of future cashflows was insignificant (lower than 1% of the outstanding amount).

An additional measure in the national aid package was the approval of a EUR 3 billion package of state guarantees and interest subsidies to support the financing of the SME sector under the IMM INVEST loan facility programme. More specifically, the eligible customers receive grants in the form of interest and fees related to financial year 2020, for the loans originated within this programme. As of 31 December 2020, a number of 2,534 applications have been approved, amounting to financed amounts of RON 1,338 million. The interest and related fees subject to the grant are a integral part of the gross carrying amount of respective loans and as of December 2020, they are in amount of RON 9.8 million. For the expected loss calculation, they are considered as receivables from the government.

TRANSLATOR'S EXPLANATORY NOTE: The above translation of the consolidated and separate financial statements is proa free translation from Romanian which is the official and binding version.

RAIFFEISEN BANK SA Notes to the consolidated and separate financial statements for the year ended 31 December 2020

6. USE OF ESTIMATES AND JUDGMENTS (continued)

Given the COVID-19 situation, the macro-economic forecast was adjusted four times during 2020, in order to reflect the new economic dynamics; overall, a worsening is shown in the following years, as compared to December 2019 macro-economic forecast.

In order to maintain an adequate provisioning coverage and taking into consideration the one-off unpredictable event (COVID-19), difficult to be modelled given the lack of similar previous events, the Group has followed a conservatory approach with an immediate reaction which consisted of:

- adding holistic treatment based on industry risk and potential risk of public and private moratorium.
 Until the end of year, the approach was reviewed and in light of observed data (default events for expired moratoria) it was substituted with a more accurate estimation through on overlay amount/ post model adjustment applied for not expired moratoria for Retail and part of Non-retail portfolio;
- 2. adjusting in a conservative manner the rating allocation system for public and private moratorium exposures of retail clients; prudent review of the risk classification of non retail clients, considering the impact of COVID crisis, triggering adequate staging.
- industry classification has been revised, based on the impact of the sanitary crisis on the recovery capacity at industry level. As a result, the Group has identified a potential increase in expected loss in case of specific industries.

Starting with June 2020, all **retail** exposures subject to active public and private moratoria measures for which the measures expired in the reporting month, were classified to Stage 2 using the holistic approach. The impact in Stage 2 provisions was EUR 7.6 million for personal individual loans and EUR 0.6 million for micro loans. After at least one month from the expiration date of public / private moratoria, the exposure was classified based on the regular IFRS 9 criteria. The impact in provisions was revised in September 2020 using observed data (entries in default of already expired moratoria) and the holistic approach was replaced with moratoria overlay, which was designed to estimate with higher accuracy the probability of default for exposures with implemented moratoria measures as of September 2020. The overlay was EUR 11.2 million, out of which EUR 5.8 million for personal individual loans and EUR 5.4 million micro loans, as of December 2020.

For **non-retail**, starting with April 2020, the debtors benefiting from public or private moratoria were initially considered in a higher risk classification. Subsequently, each debtor's credit risk status was assessed throughout the year based on portfolio or standalone analysis. Debtors most affected by the Covid situation were transferred to stage 2 and subject to lifetime expected credit loss calculation. As of December 2020, a potential credit risk deterioration of the portfolio was estimated for the SMB customers with active moratoria, considering the expected difficulties in meeting their financial obligations toward the Bank after the expiration of the moratoria option, as indicated by the data collected by the Bank. As a consequence, a Post Model Adjustment of EUR 0.8 million was implemented. The overall level of impairment in Stage 1 and 2, related to customers that benefited from moratoria increased during 2020 by EUR 4.1 million (SMB post model adjustment of EUR 0.8 million included) and it was triggered by the significant increase in the individual credit risk of debtors and the estimated retarded default effect of moratoria. On-balance sheet exposures for clients having moratoria and entered in default in 2020 was in amount of EUR 5.1 million.

The cumulated effect during 2020 for the measures described above and the update of the macro-economic forecast is an increase by EUR 23 million (which represents RON 111,253 thousand) in provision amount for retail exposures and an increase by EUR 23 million (which represents RON 111,253 thousand) in provision amount for non-retail portfolio.

Travelling expenses	(363)	1,337	(455)	1,068
Transport costs	5,178	4,276	4,783	3,813
Other taxes	5,374	7,228	3,603	5,407
Total	909,064	948,222	882,887	930,404

⁽i) The amounts under "Office space expenses" include mainly cleaning, security expenses and the VAT related to the rental paid invoices.

⁽ii) The banking tax is applicable for 2019 financial year. The basis of calculation represents the net financial assets balance at the end of the semester / year, less certain asset classes (such as cash, non-performing exposures etc). The tax was further reduced based on meeting the benchmark regarding the increase in the loan portfolio balance. The accounting treatment, according to IFRIC 21 requires that the expense is recognised one-off on 31 December, while the amount paid for the semester is recognised as "advance payment".

RAIFFEISEN BANK SA Notes to the consolidated and separate financial statements for the year ended 31 December 2020

12. OPERATING EXPENSES (continued)

(iii) The Bank pays annually contributions to the Bank Deposit Guarantee Fund for guaranteed deposits. Guaranteed deposits represent any credit balance, including the due interest, which results from funds left in an account or from temporary situations deriving from normal banking transactions and which a credit institution must repay in the legal and contractual conditions applicable. Examples of guaranteed deposits are: time deposits, current accounts, savings accounts, debit/credit card accounts.

(iv) The Bank pays contribution to resolution fund for liabilities not covered, respectively for liabilities (excluding own funds) less covered deposits. The liability to pay these levies is recognized when they become constructive. In this case, the obligation arises annually on January 1, as the Bank performs activities related to deposits received.

The expense with deposit insurance fees and resolution fund fee is recognised in the year when paid.

(v) Under the caption "Charge of litigation provision" the Group presents the expense with legal disputes, as further disclosed in note 36 Provisions.

Group: The expense with statutory audit of financial statements as at December 31, 2020 was in amount of RON 1,433 thousand (December 31, 2019: RON 947 thousand), the expense with assurance services as at December 31, 2020 was in amount of RON 218 thousand (December 31, 2019: RON 852 thousand), and the expense with non-assurance services as at December 31, 2020 was in amount of RON 205 thousand (December 31, 2019: RON 604 thousand).

Bank: The expense with statutory audit of financial statements as at December 31, 2020 was in amount of RON 1,177 thousand (December 31, 2019: RON 749 thousand), the expense with assurance services as at December 31, 2020 was in amount of RON 76 thousand (December 31, 2019: RON 701 thousand), and the expense with non-assurance services as at December 31, 2020 was in amount of RON 206 thousand (December 31, 2019: RON 604 thousand).

13. PERSONNEL EXPENSE

In RON thousand	Group)	Bank	
	2020	2019	2020	2019

Corporate income tax Deferred tax expense / (income) Income tax expense	142,262 (8,088) 134,174	184,373 3,297 187,670	134,925 (5,445) 129,480	176,257 4,120 180,377

⁽i) The adjustments recognized in the period for current tax of prior periods represent corrections on income tax statement related to prior year and which were booked in accounting after the closing process of the respective year.

The main non-taxable income is from reversal of provisions and dividends received. Non-deductible expenses are from provisions, sponsorships, accruals and other non-deductible expenses according to the Fiscal Code.

17. CASH AND CASH WITH CENTRAL BANK

	Gro	Group		ηk
	31 December 2020	31 December 2019	31 December 3 2020	1 December 2019
In RON thousand Cash on hand	6,504,154	2,701,387	6,503,734	2,700,563
Minimum compulsory reserve	4,350,045	3,805,493	4,350,045	3,805,493
Total	10,854,199	6,506,880	10,853,779	6,506,056

The Bank maintains with the National Bank of Romania the minimum compulsory reserve established under Regulation no. 6/2002 issued by the National Bank of Romania, with subsequent amendments and addendums. As of 31 December 2019, the mandatory minimum reserve ratio was 8% (31 December 2019: 8%) for funds raised in RON and 5% (December 31, 2019: 8%) for funds in foreign currency with residual maturity of less than 2 years, at the end of the observation period. For liabilities having residual maturity over 2 years at the end of the observation period, without reimbursement, conversion or early retirement clauses, compulsory minimum reserve ratio was set at 0% (31 December 2019: 0%).

The minimum compulsory reserve can be used by the Group for daily activities but under the condition that the monthly average balance of the minimum compulsory reserve is kept within the legal limits.

Total			8,843	25,304

FX swap contracts are used by the bank mainly for liquidity management. These operations are used by the bank to invest for a period of time the liquidity available in a currency by exchange it for another currency.

The Group implemented hedge accounting for its currency and interest rate derivative contracts.

The fair value of derivative financial instruments is determined by discounted cash flow models using the market quotations at the valuation date.

Foreign exchange transactions are measured by discounted future models using the market rates from Reuters and the fixing price of National Bank of Romania.

20. LOANS AND ADVANCES TO BANKS AT AMORTISED COST

TRANSLATOR'S EXPLANATORY NOTE: The above translation of the consolidated and separate financial statements is proving translation from Romanian which is the official and binding version.

Financial lease

The Group acts as a lessor in finance lease contracts for vehicles, equipment and real estate. Leasing contracts are denominated in EUR or RON and with a contract tenor of 1 to 8 years, in the case of vehicle lease contracts and 1 to 10 years in case or real estate lease. The transfer of ownership rights is at the maturity of the contract. The interest applicable to lease contracts is variable or fixed and is computed for the entire tenor of the contract. The corresponding receivables are collateralized with the object of the lease contract, as well as with other type of collaterals. Loans and advances to Group's customers include the following receivables from lease contracts:

	31 December 2020

22. INVESTMENT SECURITIES AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME

_	Grou	qı	Baı	nk	
In RON thousand	31 December 2020	31 December 2019	31 December 2020	31 December 2019	
Investment securities at fair value through of	ther comprehensive	income out of whi	ch:		
Bonds issued by the Government of Romania	2,841,071	1,922,994	2,779,427	1,851,204	
Bonds issued by Multilateral Development Banks	-	21,315	-	21,315	
Bonds issued by other public sector	331,789	411,176	331,789	411,176	
Bonds issued by credit institutions	39,668	42,676	39,668	42,676	
Total investment securities at fair value through other comprehensive income	3,212,528	2,398,161	3,150,884	2,326,371	

Treasury securities issued by the Government of Romania include discount and coupon securities denominated in RON. Discount treasury bills bear fixed interest rates. As at December 31 2020, treasury securities amounting to RON 180,355 thousand (31 December 2019: RON 107,491 thousand) are pledged as security in order to comply with National Bank of Romania prudential regulations for settlement of inter-banking operations. Income from debt instruments is recognized in interest and similar income.

Bonds issued by the Government of Romania include bonds issued by the Ministry of Finance denominated in RON, EUR and USD, bearing fixed interest rate between 0.45% p.a. and 6.75% p,a.

Bonds issued by other public sector and by credit institutions are valued using valuation models based on observable inputs (Level II), while the rest of the instruments are valued based on quoted market prices (Level I).

23. EQUITY INSTRUMENTS AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME

	Group		Bank	
In RON thousand	31 December	31 December	31 December	31 December
	2020	2019	2020	2019
Unquoted equity instruments	11,678	12,674	11,678	12,674
Quoted equity instruments	33,311	49,228	33,311	49,228
Total equity instruments at fair value through other comprehensive income	44,989	61,902	44,989	61,902

Upon initial recognition, the Group elected to classify irrevocably its equity investments, other than subsidiaries, joint ventures and associates as equity instruments at FVOCI with no recycling of gains or losses on profit or loss on derecognition.

23. EQUITY INSTRUMENTS AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME (continued)

Gains and losses on these equity instruments are never recycled to profit. Dividends are recognised in profit or loss as other operating income when the right of the payment has been established, except when the Bank benefits from such proceeds as a recovery of part of the cost of the instrument, in which case, such gains are recorded in OCI. The Group received dividends at 31 December 2020 amounting to RON 1,696 thousand (2019: RON 1,664 thousand).

The Group holds shares in Visa Inc., a company providing payment services for Visa cards. As of January 1, 2020, the Group reclassified its shares in Visa Inc. from "at fair value through other comprehensive income" category, into "mandatorily at fair value through profit and loss" category. The shares representing Series C Preferred Stock are restricted from sale, but are convertible into Class A Common Stock of Visa Inc in a maximum period of 12 years from the date in which they were granted. Due to the fact that at initial recognition it was not known the exact number of Class A shares they are converted into, they were reclassified into debt instruments instead of equity. The total reclassified amount was RON 48,228 thousand, which represented the fair value of the shares as of December 31, 2019.

During 2020, part of the Series C Preferred Stock were converted into Class A Common Stock. The converted shares were classified into "at fair value through other comprehensive income" category.

24. INVESTMENTS SECURITIES AT AMORTISED COST

	Group		Bank	
In RON thousand	31 December 2020	31 December 2019	31 December 2020	31 December 2019

25. INVESTMENT IN SUBSIDIARIES, ASSOCIATES AND JOINT VENTURES (continued)

(i)The Bank gained control on Raiffeisen Banca pentru Locuinte S.A. through acquisition of additional 66.65% shares in this participation. The transaction date was July 2019, when all the necessary approvals and contract covenants were fulfilled. The consideration paid was Euro 2,000 thousand and the fair value of net assets acquired (related to 66.66% shares) was RON 16,675 thousands generating a negative good will in amount of RON 7,204 thousands. As a result, the change in control has been reflected in the consolidation financial statements by reclassifying this participation from equity method to full consolidation (both the cost and the related provision).

On the acquisition date, the fair value of the major assets and liabilities transferred were as follows:

In RON thousand	Fair value on acquisition
Investment securities at fair value through other comprehensive income	56,247

Total	393,847	363,525	379,146	343,625	

Group: Net gains on non-trading financial assets mandatorily at fair value through profit or loss for the period ended December 31st, 2020 are in amount of RON 17,866 thousand (2019: RON 40,300 thousand).

Bank: Net gains on non-trading financial assets mandatorily at fair value through profit or loss for the period ended December 31st, 2020 are in amount of RON 17,366 thousand (2019: RON 39,619 thousand).

Accumulated amount of fair value

27. FAIR VALUE CHANGES OF THE HEDGED ITEMS-HEDGE ACCOUNTING

The Bank applies both micro and macro fair value hedge.

For the micro fair value hedge, the Bank uses as hedging instrument interest rate swaps, while the hedged items are debt securities at amortised cost. The total accumulated amount of fair value adjustments of the hedged item and hedging instrument are disclosed under "Fair value changes of the hedged items - hedge accounting" position, respectively "Derivatives – hedge accounting position" in the statement of financial position. The net loss resulted from this hedge relationship at 31 December 2020 is RON 93 thousand, while at 31 December 2019 the Bank incurred a gain of RON 34 thousand. The remaining term for the hedging item is more than 5 years (February 2030).

The macro fair value hedge started in 2020 and the Bank uses as hedging instruments four interest rate swaps, while the hedged item is a loan portfolio at amortised cost. The total accumulated amount of fair value adjustments of hedged item and hedging instruments are disclosed under "Fair value changes of the hedged items - hedge accounting", respectively "Derivatives – hedge accounting position" in the statement of financial position. The net gain/(loss) resulted from this hedge relationship at 31 December 2020 is RON 894 thousand. The remaining term for the hedging items is less than 5 years.

Total	269,179	351,297	495,663	245,887	312,105	456,471

i) In the period December 2017 – May 2019, the Bank had been subject to a fiscal audit from Romanian Tax Authority (further called "ANAF"). The object of the audit was income tax (period 2011-2016) and withholding tax (period 2013-2016).

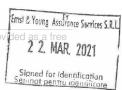

The fiscal audit report indicated total additional charges of RON 262,413 thousand which includes income tax, withholding tax and related penalties. The Bank has paid all the charges resulting from the fiscal inspection. In response, the Bank submitted an administrative appeal against the inspection report, requesting its cancellation. During 2020, the Bank received the answer to the appeal according to which the Bank is entitled to receive back 10% of the principal charges included in the tax report. The Bank continued legal procedures for the recovery of the remaining amounts and initiated a litigation in this respect.

Based on the facts and documents presented to the tax authority concerning certain operations that were the object of the control performed by the tax authority, considering the reclassification/qualifications made by the tax authority, and considering the opinions issued by the tax advisers and by the law firm that will represent the bank in a potential litigation against the tax authority, the Bank assessed that it is more likely that a court decision would be favourable to the Bank (in the sense of acknowledging the operations as performed by the bank) than to have a non-favourable court decision. As a result, the Bank recognised in 2020 as expense an amount of RON 35,283 thousand, in addition to the amount of RON 21,486 thousand reflected in 2019. The remaining amount of RON 205,644 thousand (2019: RON 240,927) paid is reflected as prepayment.

In 2020, the Bank reclassified, for 31 December 2019 reporting period, the income tax receivable and related penalties from the tax audit, from "Other assets" to "Current tax receivable" position. The reclassified amount is RON 144,366 thousand. This reclassification is a result of the IFRS Interpretations Committee agenda decision dated September 2019. This decision clarifies the presentation of uncertain tax assets and liabilities. Therefore, the amount paid in advance to the tax authorities representing income tax and related penalties has been reclassified into "Current tax receivable" position for December 2019. In 2020, the amount representing income tax receivable and related penalties from tax audit in amount of RON 126,274 thousand is also presented under "Current tax receivable" position.

According to IFRIC 23, the carrying amount of income taxes with uncertain treatment is RON 126,274 thousand (2019: RON 144,366 thousand) and resulted from the tax audit detailed above. This amount includes income tax (principal and related penalties). In this respect, the taxation authority represents the body that decides whether tax treatments are acceptable under tax law and might include the court.

ii) Clearing claims from payment transfer business include amounts to be settled as of December 31, like: cards transactions of RON 64,328 thousand (2019: RON 77,716 thousand), sales and purchase of cash of RON 0 thousand (2019: RON 26,953 thousand), Western Union transactions in course of settlement of RON 584 thousand (2019: RON 4,652 thousand) and others.

iii) Sundry debtors include various receivables such for: services provided by the bank to its customers (such as for cash transportation), advances paid to suppliers, amounts receivables as a result of operational incidents etc.

28. OTHER ASSETS (continued)

Group: Sundry debtors balance is presented at net book value, respectively gross book value in amount of 149,825 RON thousand (2019: 123,441 RON thousand) decreased with impairment in amount of RON 88,691 thousand (2019: RON 48,868 thousand).

Bank: Sundry debtors balance is presented at net book value, respectively gross book value in amount of 143,392 RON thousand (2019: 99,915 RON thousand) decreased with impairment in amount of RON 88,691 thousand (2019: RON 48,868 thousand).

In the tables below is presented the split of other assets to customers by their quality:

34. TOTAL LONG TERM DEBT (continued)

The loans received from banks and other financial institutions are denominated in EUR and RON, with a final maturity which varies between December 2021 and December 2026.

The Group takes all the necessary measures in order to ensure compliance with the financial covenants that may be attached to the loans received from banks and other financial institutions. Consequently, there have been no breaches in the financial covenants of any loans from banks and other financial institutions in the analyzed period.

Senior debt has greater seniority in the Bank's liabilities structure than subordinated debt and regulatory capital instruments as regulated by applicable insolvency law.

As of December 31, 2020, the Group has commitments received from credit institutions in amount of EUR 50.000 thousand (December 31, 2019: EUR 77.000 thousand).

As of December 31, 2020, the Bank has commitments received from credit institutions in amount of EUR 50.000 thousand (December 31, 2019: EUR 50.000 thousand).

(ii) Debt securities issued

Group: The balance of debt securities issued as at December 31, 2020, including accrued interest, is in amount of RON 480,092 thousand (December 31, 2019: RON 480,617 thousand).

Bank: The balance of debt securities issued as at December 31, 2020, including accrued interest, is in amount of RON 480,092 thousand (December 31, 2019: RON 480,617 thousand).

In December 2019, the Bank issued unsecured, subordinated RON-denominated bonds in nominal amount of RON 480,000 thousand that qualify as Tier 2 instruments. The instruments bear variable rate and have maturity on 19 December 2029. Initially the bonds were subscribed by private investors through a private placement process. According to the terms and conditions of the issuance, the bonds were admitted to trading on the Regulated Spot Market of the Bucharest Stock Exchange on 14th of May 2020, under ISIN code: ROJX86UZW1R4..

(iii) Subordinated liabilities

The balance of subordinated liabilities as at December 31, 2020, in RON equivalents, including accrued interest is RON 416,326 thousand (December 31, 2019: RON 408,645 thousand).

All subordinated loans are granted by Raiffeisen Bank International A.G.

Total	354,829	239,777	296,352	188,524	

i)The nature of provisions for litigation represents legal disputes. Expected timing of outflows for litigations cannot be appreciated, depending on various factors. Given the complexity and inherent uncertainties related to the outcome of possible scenario regarding the provision for litigation, the Group's estimates needed may differ from actual obligation resulting from the completion of such legal disputes in future periods.

Included in position "Provisions for litigations and potential risks" are the following main legal disputes:

a. Disputes with consumers

As of December 31, 2020, the provisions related to individual consumer loan litigations amounted to 11,863 RON thousand (2019: RON 16,453 thousand). They are due to contractual clauses that may generate losses because they are considered unfair by customers. The existing provisions are both for ongoing litigations and for potential ones (which might result in litigations in the future).

2 2. MAR. 2021

Signed for identification

36. PROVISIONS (continued)

b. Order no 837 dated October 20, 2017 received from the National Authority for Consumer Protection

As of 20 October 2017, the Bank received from National Authority for Consumer Protection (further called "ANPC") an order (no. 837) which requires the cancellation of an alleged incorrect practice of non-informing the customers about the future interest evolution upon loan origination. In addition to a RON 50,000 fine, the Bank is required to bring the contracts to the situation before the illegal practice, including the issue of a new reimbursement plan, with the conditions applicable on signing date. This is in contradiction with the effects of an order aimed at stopping a practice which has effects in the future and is not an action in cancellation which would have been retrospective. At the date of these financial statements, the Order is definitively suspended and a litigation regarding its validity is ongoing. In the first instance, the Bank lost the litigation with ANPC. Still, the Bank has initiated the appeal at the High Court of Cassation and Justice, with first hearing on December 7, 2021. The decision of the first instance has no legal effect, taking into consideration that the Order is suspended until an irrevocably decision is made in this file. For this legal dispute, the Bank calculated a provision based on all possible scenarios, which are weighed with probabilities in order to obtain the best estimated expected loss. The value of this provision, as of December 31, 2020, is RON 68,971 thousand (2019: 67,931 thousand) and has been made as a result of losing the litigation in the first instance.

c. Order 280 dated July 9, 2014, received from the National Authority for Consumer Protection

On February 6th, 2020, the High Court of Cassation and Justice has solved the appeal filed by Raiffeisen Bank SA against the National Authority for Consumer Protection in the file no. 988/2/2015, by rejecting it.

The subject matter of the file is the annulment of the administrative act, respectively of the Decision 280/2014 issued by the ANPC with reference to the restructuring method by including the management fee in the interest margin.

In July 2014, the ANCP had issued a decision applicable to Raiffeisen Bank S.A., asking the bank to stop the practice of including the credit management commission in the interest margin on the occasion of the restructuring of consumer loans. Although provisions describing that method were included in the respective agreements, in the authority's opinion those provisions were not clear enough. Following the High Court of Cassation and Justice decision in the file no. 988/2/2015, and based on an external legal opinion, the Bank is in process of implementing the Order. The provision booked in this respect, as of December 31, 2020, is in amount of RON 16,667 thousand (December 31, 2019: nil).

d. The litigation between Aedificium Banca pentru Locuinte S.A. and the Romanian Court of Auditors

Following an audit review of the Romanian Court of Auditors regarding the activity of Aedificium Banca pentru Locuinte S.A. (further called "ABL"), finalised in 2016, the Romanian Court of Auditors claimed that several deficiencies were identified and that conditions for state premiums on savings have not been met. Thus, such premiums may have to be repaid. Should ABL not succeed in reclaiming said amounts from its customers or providing satisfactory documentation, ABL would be liable for the payment of such funds. ABL has initiated a contestation process against the position of the Romanian Court of Auditors. The High Court of Cassation and Justice of Romania has definitively ruled in the file, rejecting the Bank's appeal and partially annulling the Decision of the Court of Accounts. Another decision is being expected, related to the exception of unconstitutionality, which was invoked by Aedificium and sent by the High Court of Cassation and Justice of Romania to the Constitutional Court (in the High Court's opinion the exception invoked by Aedificium should be admitted). ABL may not be able to receive reimbursement of such funds from its customers due to legal and practical reasons.

Given current uncertainties, on December 31, 2020 the Group made a provision of RON 91,597 thousand (2019: RON 47,903 thousand), which represent the possible outcomes of different scenarios (regarding the repayment of premiums and related penalties), weighted by their associated probabilities. In its separate financial statements, the Bank has fully provisioned its participation in ABL, meaning a provision of RON 12,466 thousand (2019: RON 42,481 thousand), has booked a write-off of the participation in amount of RON 45,015 (2019: nil) and set-up a litigation provision in amount of RON 36,627 thousand (2019: nil).

TRANSLATOR'S EXPLANATORY NOTE: The above translation of the consolidated and separate financial statements is pro translation from Romanian which is the official and binding version.

36. PROVISIONS (continued)

e. The litigation between Raiffeisen Leasing IFN S.A. and the Romanian Competition Council

At the end of 2017, the Competition Council launched an investigation for a possible violation of the competition rules at the level of the Romanian financial leasing market. Following the communication of the Report at the end of 2019, the investigated companies, including Raiffeisen Leasing IFN S.A., submitted to the Competition Council a series of Comments on the report, arguing the lack of guilt, both in the Observations and Hearings. As a result, in the deliberation meeting which took place on 25.02.2020, the Plenum of the Competition Council decided to send back the Report to the investigation team, in order to complete the analysis.

On 16.10.2020, the Competition Council issued a second report, with different facts, with a new fine proposal, significantly lower than the previous one.

The hearings for the defense of the new Report were on 03.12.2020 and the Plenum of the Competition Council did not transmit the final Decision to this day. When the decision will be received, Raiffeisen Leasing will consider its right to take legal action. As a prudent approach, a provision in this respect was already booked.

During the entire investigation Raiffeisen Leasing had a proactive communication and collaboration with the Authorities, providing studies, analyses, and having face-to-face meetings with the Competition Council for clarifications.

- ii) For off balance sheet commitments, provisions are calculated by multiplying net exposure (gross exposure minus collateral value) with historical loss rates specific for each risk category, further adjusted with the credit conversion factor. The credit conversion factor represents the Bank's expectations of the respective loan commitment to become a balance sheet exposure over its expected life.
- iii) The provision for employee benefits is the Group's one off obligation to offer a number of salaries depending on the service period. The Group has calculated provision for contributions granted to employees on retirement as at year end 2020 using indicators such as: remaining number of years with the company up to retirement, probability that employee will stay with the company up to retirement, current salary, average number of salaries paid as benefit at retirement, age, sex, expected age of retirement as per current legislation. Statistical assumptions used in provision computation in 2020 are consistent with those at year end 2019, revised as per current year available information.

36. PROVISIONS (continued)

During 2020 the provisions can be further analyzed as follows: **Group**

37. SHARE CAPITAL

Share capital

As of December 31, 2019 the number of shares is 12,000 and there were no changes in shares structure.

Share capital in amount of RON 1.2 bln consists in 12,000 shares with a nominal value of RON 100,000/share.

During 2020, Raiffeisen Bank S.A did not pay dividends to its shareholders (2019: RON 444,000 thousand, which represents a dividend of RON 37,000 /share).

37. SHARE CAPITAL (continued)

The shareholders of the Group are as follows:

	31 December 2020	31 December 2019
Raiffeisen SEE Region Holding GmbH Other shareholders	99.925 0.075	% 99.925 0.075
Total	100	100

38. OTHER EQUITY INSTRUMENTS

Other equity instruments are comprised of subordinated unsecured instruments notes issued by the Group that are classified as equity instruments in accordance to IAS 32 "Financial Instruments: Presentation". The instruments meet the criteria for inclusion in Group Tier 1 own funds, as they qualify as Additional Tier 1 instruments, as defined by Regulation (EU) No. 575/2013 (CRR), article 52. They are perpetual instruments, with no maturity, while the issuer's reimbursement is limited and subject to supervisory approval.

Although the notes include a coupon rate, this is fully discretionary and is paid out of the distributable profits. In case the Group's CET 1 Capital Ratio is below a certain threshold, this might trigger full or partial write-down of the notes. The write-down is temporary and can be followed by a write-up, which is at the sole discretion of the issuer and compliance with applicable supervisory regulations.

The total issue of the notes amounts to EUR 50 million and have been purchased by Raiffeisen Bank International A.G. (please refer to *note 40 Related party transactions*).

Transactions with key management personnel

Key management personnel is comprised of the members of the Supervisory Board, Management Board and other senior management as defined by the National Bank of Romania Regulation no.5/20.12.2013 related to the prudential requirements for credit institutions and amended by the Regulation no.5/17.12.2014.

The transactions between the Group and key management personnel are in the normal course of business, representing: loans granted, deposits placed, foreign currency transactions and guarantees issued.

The volumes of key management personnel transactions as at year-end and expense and income for the year are presented in the below tables.

In RON thousand	Group		Bank		
_	2020	2019	2020	2019	
Loans and advances to customers	7,368	6,982	7,368	6,982	
Interest income and fees and commission	90	61	90	61	
income					
Impairment for loans and advances to	207	55	207	55	
customer					
Deposits	-	-	-	-	
Interest expense	=	=	-	-	

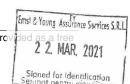

The following table shows total remuneration of the members of the Key management personnel according to IAS 24.17. The expenses according to IAS 24 were recognized on an accrual basis and according to the rules of the underlying standards, respectively IAS 19:

Key management personnel compensation

	Group	<u> </u>	Bank	[
In RON thousand	2020	2019	2020	2019
Short-term employee benefits	32,579	32,475	32,579	32,475
Other long term benefits	2,970	3,543	2,970	3,543
Total compensation	35,549	36,018	35,549	36,018

Short-term employee benefits shown in the above table contain salaries and benefits in kind and other benefits and those parts of the bonuses which become due for the short term. Furthermore, changes possibly arising from the difference between the bonus provision and the later awarded bonus are also contained.

Other long-term benefits contain bonus payments, deferred on a period above one year, payable in cash.

41. COMMITMENTS AND CONTINGENCIES

i) Credit related commitments

Guarantees and letters of credit

The Group issues guarantees and letters of credit for its customers. Guarantees and letters of credit represent irrevocable assurances that the Group will make payments in the event that a customer cannot meet its obligations to third parties. The primary purpose of letters of credit is to ensure that funds are available to a customer as required.

Credit related commitments

Loan commitments represent unused amounts of approved credit facilities.

Off-balance sheet contractual amounts of loan commitments, guarantees and letters of credit issued are presented in the following table:

	Gr	roup	Ba	nk

In "Not Rated" category are also included retail exposures of subsidiaries for which the standard approach method is applied in the calculation of risk weighted assets. For the standard approach portfolios, no models are available and so the internal rating is not applicable. For these exposures, general IFRS 9 impairment rules apply, as described in Note 3 (ix) Identification and measurement of impairment.

In "Not Rated" category are also included retail exposures of subsidiaries for which the standard approach method is applied in the calculation of risk weighted assets. For the standard approach portfolios, no models are available and so the internal rating is not applicable. For these exposures, a simplified approach is used for impairment calculation.

ii) Other contingent liabilities

On August 2018, ANPC started an inspection regarding loans originated by the Bank and subsequently sold to other entities. The inspection is not finalised at the date of these financial statements and no provision has been booked in respect of this inspection.

The current estimation about the maximum potential loss as a result of an unfavourable decision in the litigation between ABL and the Romanian Court of Auditors, described in note 36 above, is RON 259,877 thousand, out of which the amount of RON 91,597 thousand is provisioned (2019: RON 47,903 thousand).

TRANSLATOR'S EXPLANATORY NOTE: The above translation of the consolidated and separate financial statements is protranslation from Romanian which is the official and binding version.

43. CAPITAL

The capital management of the Group is defined through the capital strategy approved by the Management Board and is reviewed at least once every year.

The primary objective of the Group's capital management is to ensure an adequate level of capital which meets not only the regulatory requirements, but also the limits set in the capital strategy.

The Management Board of the Group actively manages the capital structure and seeks to maintain at all times a higher level of capital than the regulatory one in order to ensure a comfortable position in achieving the Group's business objectives.

No major changes have been made to the objectives and policies regarding capital management compared to the previous year.

Regulation (EU) No. 575/2013 of the European Parliament and of the Council of 26 June 2013 on prudential requirements for credit institutions and investment firms and amending Regulation (EU) No.648/2012 requires that the Group maintain a minimum Common Equity Tier 1 capital ratio of 4.5 %, a minimum Tier 1 capital ratio of 6 % and a minimum total capital ratio of 8 %.

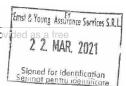

According to supervisory review, Group was requested through an official notification to hold additional capital to cover risks which are not or not adequately taken into account under pillar I. The Group is also subject to Conservation and other systemically important institutions buffer. The Group is compliant with all of the above requirements.

Regulatory capital consists of Tier 1 and Tier 2 layers of capital. Tier 1 is made of share capital, premium reserves, retained earnings (excluding current year profit) and deductions according to legislation in force. Tier 2 capital includes subordinated long term debt and deductions according to legislation in force.

As of December 2019, the Group issued Additional Tier 1 Notes in amount of RON 238,599 thousand that were purchased by Raiffeisen Bank International AG. The instruments are classified as equity instruments in accordance to IAS 32 "Financial Instruments: Presentation" and meet the criteria for inclusion in Group Tier 1 capital (see *note 38 Other equity instruments*).

Also in December 2019, the Bank issued unsecured, subordinated RON-denominated bonds in nominal amount of RON 480,000 thousand that qualify as Tier 2 instruments as defined by Regulation (EU) No. 575/2013 (see note *34 Total long term debt*).

44. SEGMENTS CONSOLIDATION

Key decisions are made by chief operating decision makers determining the resources allocated to each segment based on its financial strength and profitability.

The Group follows financial performance and steers the business by segments and products, namely customer business consists of Corporate, Retail, Financial Institutions and Own employees. Corporate comprises legal entities with an annual turnover exceeding EUR 5 million. Retail contains individual clients and legal entities with an annual turnover below the EUR 5 million threshold (small and medium entities), while Financial Institutions (part of Treasury Division) deals with brokers, banks, insurance companies, leasing firms, investment and pension funds, as well as asset management companies.

The Group offers a wide array of banking services to its customers, adapted to the ever changing needs of our clients, but with maintained focus on the basics of banking.

Customer business lines bring in more than 85% of the Group's operating income, with following specifics worth mentioning: corporate clients chiefly draw their revenue streams from lending business, followed by fees from cash management, account services, foreign currency deals and investment banking activity.

Small clients also share these characteristics, while their unique business traits are visible through more intense payment and account activity, thus generating visibly greater proportion of the revenues as fees.

Private individual customers provide a highly diversified revenue source for the Group, mainly from unsecured loans, credit card and overdraft facilities, but also from mortgage loans, saving products and transactional business, FX deals and asset management services, as well as from the activity of intermediating transactions on the stock exchange; the Group continues to focus its attention on promoting alternative channels usage and thus provide improved services with advantages for both sides. Revenues are also brought in from loans and deposits granted to own employees, reported below as part of segment "Others".

Proprietary business consists of Treasury Division (less Financial Institutions) and "Others" segment (less Own employees). The first mainly provides income streams from treasury activities, namely trading revenues, net income from financial assets held at fair value through profit or loss, as well as from interest contribution. The latter shows revenues mainly obtained as a result of transfers among segments, capital benefit, income generated by participations.

Regarding the segmentation by geographical area, the Group is performing its activity mainly under geographical area of Romania.

45. SUBSEQUENT EVENTS

Aedificium Banca pentru Locuinte - capital increase

Following the legal provisions made by Aedificium Banca pentru Locuinte (ABL) in respect of its litigation with the Romanian Court of Auditors (further detailed in Note 36 Provisions), the result was that ABL was in breach of internal capital adequacy internal limit. On 11 March 2021, the Extraordinary General Shareholders Meeting of the ABL approved the increase of share capital by RON 65 million. The additional capital would allow ABL to continue its operations, considering the current estimate of the litigation.
