1. What is this product?

Type

Austrian law governed equity-linked certificates / Return depends on the performance of the underlying / Partial capital protection up to 97.00% against market risk

Term

The product has a fixed term and will be due on 3 December 2029.

Objectives

(Terms that appear in **bold** in this section are described in more detail in the table(s) below.)

The product is designed to provide a return in the form of a cash payment on the **maturity date** in an amount that depends on whether the **underlying** satisfies the barrier conditions specified below. The payment at maturity will not exceed EUR 1,215.00.

On termination of the product on the **maturity date** you will receive:

1. if the **final reference level** is at or above the **initial reference level**, a cash payment equal to EUR 1,215;
2. otherwise, if the **final reference level** is at or above 97.00% of the **initial reference level** and below the **initial reference level**, a cash payment equal to EUR 1,000;
3. otherwise, if the **final reference level** is below 97.00% of the **initial reference level**, a cash payment equal to EUR 970.

Under the product terms, certain dates specified below will be adjusted if the respective date is either not a business day or not a trading day (as applicable). Any adjustments may affect the return, if any, you receive.

The product terms also provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the issuer may terminate the product early. These events are specified in the product terms and principally relate to the **underlying**, the product and the issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

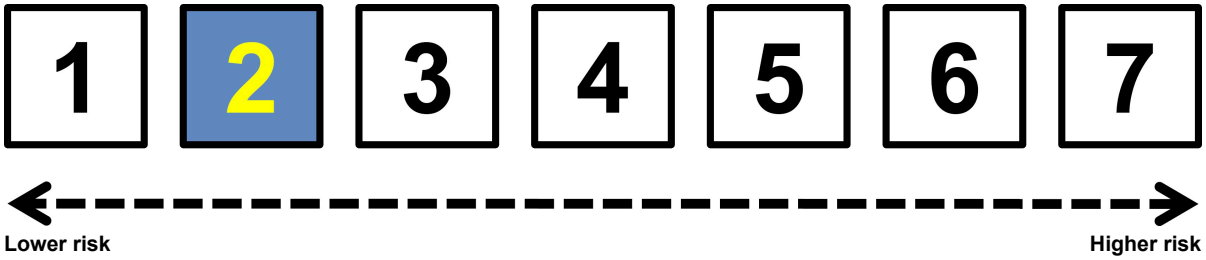
Intended retail client

The product is intended for private clients, professional clients and qualified counterparties who pursue the objective of general asset accumulation/asset optimization and have a maximum of a medium-term investment horizon. This product is for customers with basic knowledge and/or experience with financial products. The investor can bear losses up to the entire amount of the invested capital and is willing to accept a level of risk to achieve potential returns that is consistent with the summary risk indicator shown below.

2. What are the risks and what could I get in return?

Risk indicator



DocID: / 14d695f2-a28b-47dd-9e48-6982c34dc205

The risk indicator assumes you keep the product until 3 December 2029. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

To the extent the currency of the country in which you purchase this product or your account currency differs from the product currency, please be aware of currency risk. You will receive payments in a different currency so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Inflation erodes the purchasing value of cash over time and this may result in the decline in real terms of any capital reimbursed.

If we are not able to pay you what is owed, you could lose your entire investment.

For detailed information about all risks relating to the product please refer to the risk sections of the prospectus and any supplements thereto as specified in the section "7. Other relevant information" below.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		**3 years and 6 months**	
Example investment:		EUR 10,000	
Scenarios		***If you exit after 1 year***	***If you exit after 3 years and 6 months (Recommended holding period)***
Minimum	**EUR 9,700. The return is only guaranteed if you hold the product to maturity. You could lose some or all of your investment.**		
Stress	**What you might get back after costs**	EUR 8,812	EUR 9,700
	Average return each year	-11.88%	-0.87%
Unfavourable	**What you might get back after costs**	EUR 10,745	EUR 12,150
	Average return each year	7.45%	5.72%
Moderate	**What you might get back after costs**	EUR 11,011	EUR 12,150
	Average return each year	10.11%	5.72%
Favourable	**What you might get back after costs**	EUR 11,121	EUR 12,150
	Average return each year	11.21%	5.72%

The favourable, moderate, unfavourable and stress scenarios represent possible outcomes that have been calculated based on simulations using the past performance of the **underlying** over a period of up to 5 years. The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

3. What happens if Raiffeisen Bank International AG is unable to pay out?

The product is not covered by any statutory or other deposit protection scheme. You may suffer a total loss of your investment if Raiffeisen Bank International AG is unable to make the payments due under the product. This may occur if Raiffeisen Bank International AG becomes insolvent or is affected by resolution measures taken by the competent authority before an insolvency. These measures (referred to as “bail-in”) include the partial or full write-down of the notional amount or the conversion of the product into shares of Raiffeisen Bank International AG.

4. What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 is invested

	If you exit after 1 year	***If you exit after 3 years and 6 months***
Total costs	EUR 200	EUR 200
Annual cost impact*	2.04%	0.61% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6.33% before costs and 5.72% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of costs

	One-off costs upon entry or exit	If you exit after 1 year
Entry costs	2.00% of the amount you pay when entering this investment. These costs are already included in the price you pay.	EUR 200
Exit costs	We do not charge an exit fee for this product, but the person selling you the product may do so.	EUR 0

5. How long should I hold it and can I take money out early?

Recommended holding period: 3 years and 6 months

The product aims to provide you with the return described under “1. What is this product?” above. However, this only applies if the product is held to maturity. It is therefore recommended that the product is held until 3 December 2029 (maturity).

The product does not guarantee the possibility to disinvest other than by selling the product either (1) through the exchange (if the product is exchange traded) or (2) off-exchange, where an offer for such product exists. Save as otherwise disclosed in exit costs (see section "4. What are the costs?" above), no fees or penalties will be charged by the issuer for any such transaction, however an execution fee might be chargeable by your broker if applicable. By selling the product before its maturity, you may receive back less than you would have received if you had kept the product until maturity.

Exchange listing	Börse Stuttgart - Freiverkehr - Technical Platform 4 and Wiener Börse AG Amtlicher Handel (Official Market)	**Last exchange trading day**	28 November 2029 (Börse Stuttgart - Freiverkehr - Technical Platform 4) and 28 November 2029 (Wiener Börse AG Amtlicher Handel (Official Market))
Smallest tradable unit	EUR 1,000.00	**Price quotation**	Percentage

In volatile or unusual market conditions, or in the event of technical faults/disruptions, the purchase and/or sale of the product can be temporarily hindered and/or suspended and may not be possible at all.

6. How can I complain?
