Raiffeisen Bank SA

Update to credit analysis

Summary

Raiffeisen Bank SA's (RBRO) Baa1 long-term deposit and senior unsecured ratings reflect the bank's ba1 standalone Baseline Credit Assessment (BCA), one notch of rating uplift based on our assumption of a high likelihood of affiliate support from its parent, [Raiffeisen Bank International AG](#) (RBI, A1/A1 stable, baa3¹) and two notches of rating uplift from the application of our Advanced Loss Given Failure (LGF) analysis that considers the severity of losses faced by different liability classes in the event of a resolution.

RBRO's ba1 BCA reflects its sound capital buffers and strong profitability. Our assessment also incorporates the bank's large liquidity buffers, its predominantly deposit-based funding profile but also the significant portion of foreign-currency (FC) deposits, which elevate funding risks. The ba1 BCA further captures the high concentration in its loan book stemming from its large corporate exposure as well as its high exposure to riskier unsecured consumer loans.

Exhibit 1

Key financial ratios

These are our Banks Methodology scorecard ratios. Asset Risk and Profitability reflect the weaker of either the latest figure or the three-year and latest figure average. Capital is the latest reported figure. Funding Structure and Liquid Resources reflect the latest fiscal year-end figures.

Source: Moody's Ratings

Credit strengths

- » Strong earnings generation capacity
- » Sound capitalisation metrics, well above regulatory requirements
- » High liquidity buffers

Credit challenges

- » Asset risks from FC-denominated loans, high credit growth and sector concentrations
- » Significant proportion of FC deposits entail funding risks in a sovereign-related adverse-case scenario

Outlook

The negative outlook on RBRO's long-term deposit ratings is driven by the negative outlook on the sovereign rating. In case of a downgrade of the [Government of Romania's](#) (Baa3 negative) rating, the ratings of RBRO would be capped at two notches above the sovereign rating.

Factors that could lead to an upgrade

- » RBRO's Baa1 deposit and senior unsecured debt ratings are constrained at two notches above the Government of Romania's Baa3 rating. They could be upgraded only following an upgrade of the sovereign rating.
- » The Baa2 junior senior unsecured debt rating could be upgraded in case of an upgrade of the bank's Adjusted BCA, or a substantial increase in outstanding volumes of such debt or debt subordinated to it that may lower loss severity and result in higher notching uplift under our Advanced LGF analysis.
- » RBRO's Adjusted BCA could be upgraded following a combination of an upgrade of RBI's BCA and an upgrade of its own BCA because of sustainably improved asset quality and an increase in capital while maintaining solid liquidity buffers as well as strong core profitability.

Factors that could lead to a downgrade

- » RBRO's deposit and senior unsecured ratings could be downgraded in case of a downgrade of Romania's sovereign rating that would constrain these ratings lower.
- » The junior senior unsecured debt rating could be downgraded in case of a downgrade of its Adjusted BCA, or changes in the bank's liability structure that would lower the notching uplift from our LGF analysis.
- » RBRO's Adjusted BCA could be downgraded either in case of a downgrade of its BCA, or lower affiliate support uplift resulting from a downgrade of RBI's BCA or a reduced probability of parental support. RBRO's BCA could be downgraded following a substantial deterioration in asset quality, a sustained weakening of its profitability and capital, or a funding shock and pressure on its liquidity.

This publication does not announce a credit rating action. For any credit ratings referenced in this publication, please see the issuer/deal page on <https://ratings.moody.com> for the most updated credit rating action information and rating history.

Profile

RBRO is a Romanian universal bank and a 99.95% owned subsidiary of Austria's RBI. The bank provides financial services to individuals, small and medium-sized enterprises (SMEs) and corporate clients. The bank also offers leasing and asset management services through its subsidiary companies.

With year-end 2024 total assets of RON83 billion (around €17 billion), RBRO was the fifth-largest bank by assets in Romania with a market share of 9.3%, but it was the fourth-largest by gross loans with a market share of 10.3%.

Detailed credit considerations

Good loan quality metrics, but elevated asset risks from FC-denominated loans, high credit growth and sector concentrations

Our ba2 Asset Risk score reflects the bank's good loan quality, with a problem loan ratio below 3% since 2022, but also currency-induced credit risk from a material share of FC loans; strong loan growth in recent years that suggests the portfolio is still unseasoned, although this is broadly in line with the market; and some concentration in unsecured consumer finance. There is also concentration to the Romanian sovereign, mainly as part of the bank's liquidity portfolio. Although this exposure had been lower than the sector average in terms of total assets and equity, it has increased in recent quarters.

RBRO's asset quality steadily improved in recent years supported by the close oversight of overdue exposures and aided by write-offs, recoveries and sales of problem loans. The bank's problem loans (defined as IFRS 9 Stage 3 loans and purchased or originated credit impaired loans) was 2.7% of gross loans as of December 2024 (see Exhibit 3). The coverage of problem loans by Stage 3 provisions stood at 59%, while riskier Stage 2 loans decreased slightly to 11% of gross loans and remain below domestic peers.

Going forward, we expect higher problem loan formation because of macroeconomic headwinds in Romania that will affect borrowers' repayment ability, including a weaker growth outlook, an increased tax burden and elevated inflation, and for credit costs (loan loss provision expenses/average gross loans) to increase from recent low levels. Credit costs were close to zero in 2023 and 0.1% in 2024. Interim Q2 2025 information published by RBI show stable nonperforming exposures as of June 2025, while credit costs picked up to 0.2% in the first half of 2025.

A significant weakening of the local currency versus the euro remains a key source of asset risk because the bank's FC lending (mainly euro-denominated) accounts for around a third of its gross loans. Most of these loans are to larger corporate clients, and there is

limited outstanding FC lending towards private individuals. Additionally, RBRO is largely exposed to unsecured loans to consumers, at 22% of gross loans as of December 2024 (see Exhibit 4, figure includes personal loans, excluding those guaranteed by mortgages, overdrafts and credit cards) and around 155% of the bank's Tangible Common Equity (TCE), a segment with typically higher inherent default risk. The bank's exposure to the cyclical real estate and construction sectors was equivalent to 8% of gross loans.

Exhibit 3

Exhibit 4

RBRO's is largely exposed to consumer loans Breakdown of credit by segment as of the end of 2024

Credit to the public sector and sovereign increased during 2024 and includes a term deposit placed at Ministry of Finance of RON4.25 billion.

Sources: Company reports and Moody's Ratings

Sound capitalisation, which is well above regulatory requirements

RBRO's has sound capital and therefore loss-absorbing buffers, which drives our ba1 Capital score. Our assessment reflects our expectation of the bank's TCE ratio will hover around 15%, and also captures potential volatility in capital metrics in a stress scenario where the leu depreciates and the leu-equivalent of FC risk-weighted assets increase.

The bank's TCE-to-risk-weighted assets ratio was 16.6% as of year-end 2024, slightly down from 16.8% at year-end 2023 (see Exhibit 5). Our TCE ratio includes all current period profits and does not include some regulatory deductions and certain revaluation reserves that are considered in the calculation of Tier 1 capital, but we consider higher risk weights for RBRO's sovereign bond holdings based on our ratings at the time of reporting per our standard adjustment.

Exhibit 5

RBRO's has sound capital metrics

Source: Moody's Ratings

RBRO's reported regulatory Common Equity Tier 1 (CET1) capital ratio was 17.5% as of the end of 2024 and its total capital ratio was 21.4%, both comfortably above regulatory requirements. The minimum CET1 and total capital ratios that at that time were 11.9% and

17.6% respectively and included a 1% countercyclical capital buffer, a 1% other systemically important bank buffer for RBRO and a bank-specific 5.1% Pillar 2 requirement included in the total capital ratio minimum.

Strong earnings generation capacity

RBRO benefits from a strong and sustainable earnings generation capacity. Potentially higher provisions from recent very low levels and the turnover tax drive our expectation of still-strong but lower profitability in the coming quarters. These drivers are reflected in our baa3 Profitability score.

In 2024, net income to tangible assets decreased to 2.0% from 2.3% in 2023. Revenues were mainly driven by net interest income growth of 8% year-over-year to RON3 billion (see Exhibit 6), in turn driven by dynamic lending activity. Net fee and commission income, which represented 17% of operating income in 2024, grew by 12% versus 2023.

Total operating expenses also increased to RON2.0 billion (2023: RON1.8 billion) driven by higher staff costs and the impact of the new turnover tax that is presented under expenses. A tax on banks' turnover at 2% was implemented starting from January 2024, which was to be lowered to 1% starting January 2026. However, the turnover tax was increased to 4% for the period between 1 July 2025 and 31 December 2026 as part of the government's fiscal deficit reduction package. Meanwhile, the bank reported a net loan loss provision charge of RON23 million, compared with a net release of RON29 thousands one year earlier.

Exhibit 6

Higher net interest income is the main driver of revenue growth, but expenses have also increased

Breakdown of net income

Sources: Company reports and Moody's Ratings

Looking ahead, we expect pressure on profitability given contracting net interest margins, which are coming off a recent peak (2024: 3.9%, 2023: 4.1%), and our expectation of higher loan loss provisions. The tax on turnover will remain a drag on RBRO's profitability and we estimate that the higher 4% tax would reduce net income to tangible assets by approximately 25 basis over an entire year.

Strong deposit franchise but significant proportion of FC deposits entail funding risks; high liquidity balances these risks

RBRO's ba1 Funding Structure score captures the bank's strong deposit funding franchise, with limited reliance on more confidence sensitive market funding at 8% of tangible banking assets as of December 2024, as well as funding risks arising from the significant proportion of FC deposits.

Customer deposits were equivalent to 79% of RBRO's 2024 total assets (see Exhibit 7) and more than funded its lending activities with the net loan-to-deposit ratio at 75%. Deposits are granular with retail deposits accounting for 69% of the total deposit base. Market funding reliance is mainly driven by issuances to meet the minimum requirement for own funds and eligible liabilities (MREL). The RBI group is subject to a multiple point of entry approach and therefore its foreign subsidiaries, such as RBRO, typically issue MREL-eligible debt to third parties. Given that RBRO meets its MREL we expect market funding reliance to remain broadly stable at around 10% of assets.

Exhibit 7
RBRO is predominantly funded by retail deposits as of year-end 2024

Sources: Company reports and Moody's Ratings

In line with other Romanian banks, RBRO has a substantial dependence on FC funding. Around a third of customer and interbank deposits are FC-denominated, mainly in euro. While exchange-related risks are mitigated by a similar share of FC loans, FC deposits are more prone to deposit flights in a sovereign stress scenario. Furthermore, this degree of deposit euroisation indicates limited confidence in the RON, whereby political and economic shocks can lead to conversions of local-currency deposits into euro that further complicate liquidity management.

RBRO's high liquidity mitigates funding risks and drives our ba1 Liquid Resources score. Liquid assets were 38% of tangible banking assets at end-2024, with cash and interbank balances accounting for 45% of the liquidity reserve while the remaining was mostly invested in Romanian government bonds. However, in our analysis we consider the large amount of Romanian sovereign bonds of weaker quality compared the bank's cash holdings, while they can also be impacted by revaluation effects. The bank's liquidity coverage ratio was a strong 225% in July 2025 according to information published by RBI.

ESG considerations

Raiffeisen Bank SA's ESG credit impact score is CIS-2

Exhibit 8
ESG credit impact score

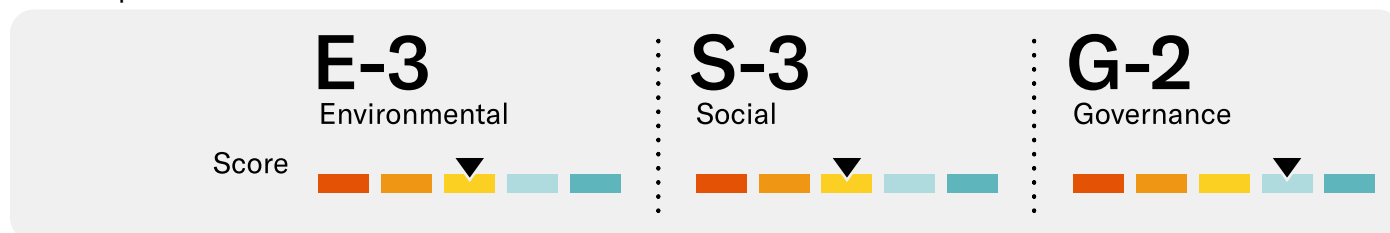

Source: Moody's Ratings

Raiffeisen Bank SA (RBRO)'s **CIS-2** indicates that ESG considerations have no material impact on the current ratings.

Exhibit 9

ESG issuer profile scores

Source: Moody's Ratings

Environmental

RBRO faces moderate environmental risks mainly because of its portfolio exposure to carbon transition risk as a large, universal bank in Romania. Like peers, the bank is facing growing business risks and stakeholder pressure to meet broader carbon transition goals. In response, RBRO is actively engaging in further developing its risk management and climate risk reporting frameworks and trying to align its business with the transition to a low-carbon economy.

Social

RBRO faces moderate social risks mostly related to customer relations, as well as to demographic and societal trends. The bank's developed policies and procedures, supported by its Austrian parent's oversight, mitigate conduct risk associated with the distribution of financial products such as regulatory and reputational risks, as well as exposure to litigation. High cyber and personal data risks are mitigated by technology solutions and organisational measures to prevent data breaches. Product diversity and the ability to adapt to changing consumer preferences, regulatory changes and societal trends such as digitization help address related risks.

Governance

RBRO faces low governance risks. The bank's risk management, policies and procedures are in line with industry practices, and commensurate with its universal banking model. Because RBRO is effectively controlled by Raiffeisen Bank International AG through its 100% shareholding, we have aligned the subsidiary's board structure, policies and procedures score with that of its parent, given the bank's strategic importance and public affiliation with the group, the parent's oversight of its subsidiary board and the regulated nature of both entities.

ESG Issuer Profile Scores and Credit Impact Scores for the rated entity/transaction are available on Moody's.com. In order to view the latest scores, please click [here](#) to go to the landing page for the entity/transaction on MDC and view the ESG Scores section.

Support and structural considerations

Affiliate support

We assess the probability of affiliate support to be high, based on RBRO's ownership by RBI and the association with RBI's brand. This assessment results in one notch of uplift to the Adjusted BCA of baa3 from the BCA of ba1.

Loss Given Failure (LGF) analysis

We apply our Advanced LGF analysis to RBRO's liabilities because it is subject to the EU Bank Recovery and Resolution Directive (BRRD), which is an operational resolution regime. In our Advanced LGF analysis we use our standard assumptions and assume a residual TCE of 3% and post-failure losses of 8% of tangible banking assets, a 25% runoff in junior wholesale deposits, a 5% runoff in preferred deposits and a proportion of 26% of deposits considered junior (in line with the EU average), and assign a 25% probability to deposits being preferred to senior unsecured debt.

For the deposits and senior unsecured debt, our Advanced LGF analysis indicates an extremely low loss given failure. Our assigned notching is driven by the applicable rating cap, two notches higher than the Romanian government's debt rating. Without this restriction, the deposits and senior unsecured instruments would have benefited from three notches of rating uplift above the bank's Adjusted BCA.

For the junior senior unsecured debt, our Advanced LGF analysis indicates a low loss given failure, leading to one notch of rating uplift above the bank's Adjusted BCA.

Government support considerations

We incorporate a low likelihood of support from the Romanian government for RBRO's deposits in the event of its failure. This reflects the operational resolution regime, which is likely to restrict the ability of the government to provide such support, even if it were willing to do so, requiring losses to be imposed on more senior creditors and large depositors under certain circumstances. Consequently, RBRO's deposit and senior unsecured debt ratings do not benefit from any uplift from systemic support from the Romanian authorities.

Methodology and scorecard

About Moody's Bank Scorecard

Our scorecard is designed to capture, express and explain in summary form our Rating Committee's judgement. When read in conjunction with our research, a fulsome presentation of our judgement is expressed. As a result, the output of our scorecard may significantly differ from that suggested by raw data alone (though it has been calibrated to avoid the frequent need for strong divergence). The scorecard output and the individual scores are discussed in rating committees and may be adjusted up or down to reflect conditions specific to each rated entity.

Moody's Investors Service, Inc., a wholly-owned credit rating agency subsidiary of Moody's Corporation ("MCO"), hereby discloses that most issuers of debt securities (including corporate and municipal bonds, debentures, notes and commercial paper) and preferred stock rated by Moody's Investors Service, Inc. have, prior to assignment of any credit rating, agreed to pay Moody's Investors Service, Inc. for credit ratings opinions and services rendered by it. MCO and all MCO entities that issue ratings under the "Moody's Ratings" brand name ("Moody's Ratings"), also maintain policies and procedures to address the independence of Moody's Ratings' credit ratings and credit rating processes. Information regarding certain affiliations that may exist between directors of MCO and rated entities, and between entities who hold credit ratings from Moody's Investors Service, Inc. and have also publicly reported to the SEC an ownership interest in MCO of more than 5%, is posted annually at ir.moody.com under the heading "Investor Relations — Corporate Governance — Charter and Governance Documents - Director and Shareholder Affiliation Policy."

Moody's SF Japan K.K., Moody's Local AR Agente de Calificación de Riesgo S.A., Moody's Local BR Agência de Classificação de Risco LTDA, Moody's Local MX S.A. de C.V., I.C.V., Moody's Local PE Clasificadora de Riesgo S.A., and Moody's Local PA Clasificadora de Riesgo S.A. (collectively, the "Moody's Non-NRSRO CRAs") are all indirectly wholly-owned credit rating agency subsidiaries of MCO. None of the Moody's Non-NRSRO CRAs is a Nationally Recognized Statistical Rating Organization.

Additional terms for Australia only: Any publication into Australia of this document is pursuant to the Australian Financial Services License of MOODY'S affiliate, Moody's Investors Service Pty Limited ABN 61 003 399 657 AFSL 336969 and/or Moody's Analytics Australia Pty Ltd ABN 94 105 136 972 AFSL 383569 (as applicable). This document is intended to be provided only to "wholesale clients" within the meaning of section 761G of the Corporations Act 2001. By continuing to access this document from within Australia, you represent to MOODY'S that you are, or are accessing the document as a representative of, a "wholesale client" and that neither you nor the entity you represent will directly or indirectly disseminate this document or its contents to "retail clients" within the meaning of section 761G of the Corporations Act 2001. MOODY'S credit rating is an opinion as to the creditworthiness of a debt obligation of the issuer, not on the equity securities of the issuer or any form of security that is available to retail investors.

Additional terms for India only: Moody's credit ratings, Assessments, other opinions and Materials are not intended to be and shall not be relied upon or used by any users located in India in relation to securities listed or proposed to be listed on Indian stock exchanges.

Additional terms with respect to Second Party Opinions and Net Zero Assessments (as defined in Moody's Ratings Rating Symbols and Definitions): Please note that neither a Second Party Opinion ("SPO") nor a Net Zero Assessment ("NZA") is a "credit rating". The issuance of SPOs and NZAs is not a regulated activity in many jurisdictions, including Singapore. JAPAN: In Japan, development and provision of SPOs and NZAs fall under the category of "Ancillary Businesses", not "Credit Rating Business", and are not subject to the regulations applicable to "Credit Rating Business" under the Financial Instruments and Exchange Act of Japan and its relevant regulation. PRC: Any SPO: (1) does not constitute a PRC Green Bond Assessment as defined under any relevant PRC laws or regulations; (2) cannot be included in any registration statement, offering circular, prospectus or any other documents submitted to the PRC regulatory authorities or otherwise used to satisfy any PRC regulatory disclosure requirement; and (3) cannot be used within the PRC for any regulatory purpose or for any other purpose which is not permitted under relevant PRC laws or regulations. For the purposes of this disclaimer, "PRC" refers to the mainland of the People's Republic of China, excluding Hong Kong, Macau and Taiwan.
